

EUREF Promotion and Outreach: EUREF Tutorial

Wolfgang Söhne

FederalAgencyforCartographyandGeodesy

- **AI17_63on WS:** prepare, for the next TWG, plan and schedule for a possible EUREF tutorial in connection to the next EUREF Symposium (Item 13).
- **Background was:** questionnaire was prepared and distributed for the last symposium in Budapest to get a feedback on the idea for such a tutorial and expectations of potential participants

Wereceived a total of **34** answers (29 at the symposium, 5 after wardsper mail).

What date and location would you prefer?

- Closely before the symposium: 25

Optimal length of the tutorial?

- 1 day: 13
- 2 days: 18

Topics for such a tutorial (multiple answers allowed, 18 items)?

- From 27 (EVRS realization) to 10 (EPN station guidelines)

One day tutorial

- Monday: what to do on Tuesday for the participants?
- Tuesday: TWG to be scheduled for Monday or taking place in parallel to the tutorial

Two days tutorial

- No TWG meeting during the symposium or TWG meeting on Sunday or TWG meeting in parallel to the tutorial

Topics

- EVRS: realization/current status, definition, link with INSPIRE
- ETRS89: realization/current status, coordinate transformation, densification, definition, link with ITRS, link with INSPIRE, usage
- EPN: multi-GNSS challenges, real-time tools and products, interpretation of position time series, data and products, data analysis/combining and stacking of SINEX solutions, etc.

Strategy

- Wide distribution of topics (watering can)
- Concentration on two or even one topic
- Practice (demonstration of usage of e.g. G-NUT, BNC, CATREF, EPN tools, ...)
- Theory (definition, links, strategies,...)
- Presenters from TWG members only or from beyond?

Planning issues

- Put tutorial on the symposium's webpage, allow registration together with the other registration options
- Communicate the program (topics and presenters) as soon as possible
- Set a minimum number of participants for the tutorial, e.g. 10
- If minimum number not reached: skip tutorial, i.e. give a deadline (earlier than deadline for the symposium itself) for notification
- Attractive participant fee for combined tutorial + symposium
