

EUVN_DA: ESTABLISHMENT OF A EUROPEAN CONTINENTAL GPS/LEVELING NETWORK

EUVN_DA WORKING GROUP:

KENYERES, A.

SACHER, M.- IHDE, J. - DENKER, H. - MARTI, U.

IGFS2006 SYMPOSIUM, 28.08 – 01.09 2006, ISTANBUL, TURKEY

WHAT IS EUVN_DA?

Densification Action of EUVN

- Joint effort of the European Mapping Agencies to establish a homogeneous, dense continental GPS/leveling reference network
- strict data quality standards, cm-accuracy expected
- initiated by EUREF in 2003, EGGP (European Gravity and Geoid Project) is a cooperation partner

mutual interest: control data for geoid and GPS/leveling

- contribution to the accurate continental height reference surface consistent with ETRS89 and EVRS.

PREDECESSOR: EUVN

European Unified Vertical Network

height datum offsets wrt NAP

Targets:

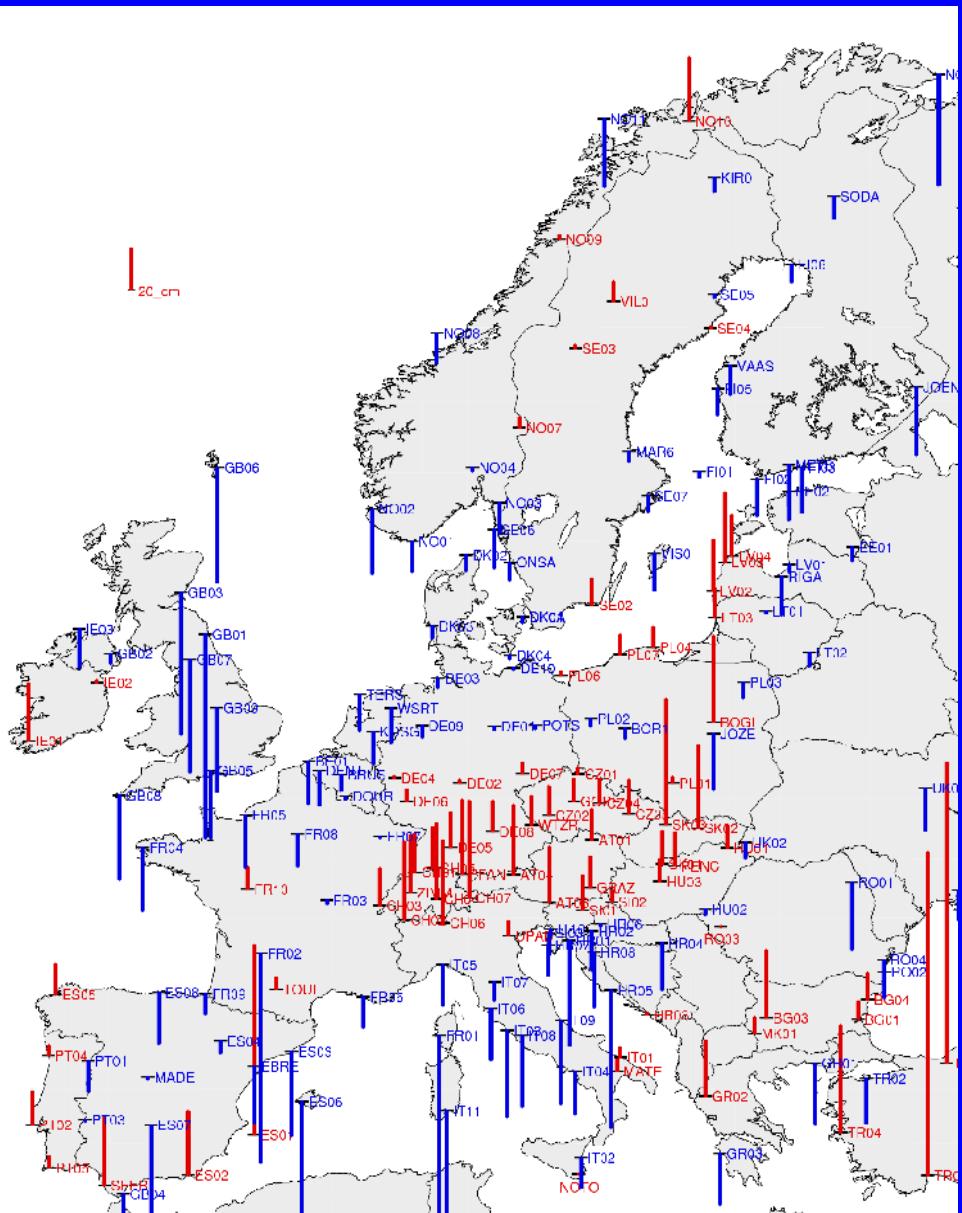

- vertical datum unification
 - tide gauge connection

The network:

- 196 benchmarks
(UELN nodal points, permanent stations, tide gauges)
 - GPS campaign in 1997 (ETRF96) connected to UELN

PREDECESSOR: EUVN

European Unified Vertical Network

Comparison with EGG97

- outliers, trends, high scatter
 - sparse network

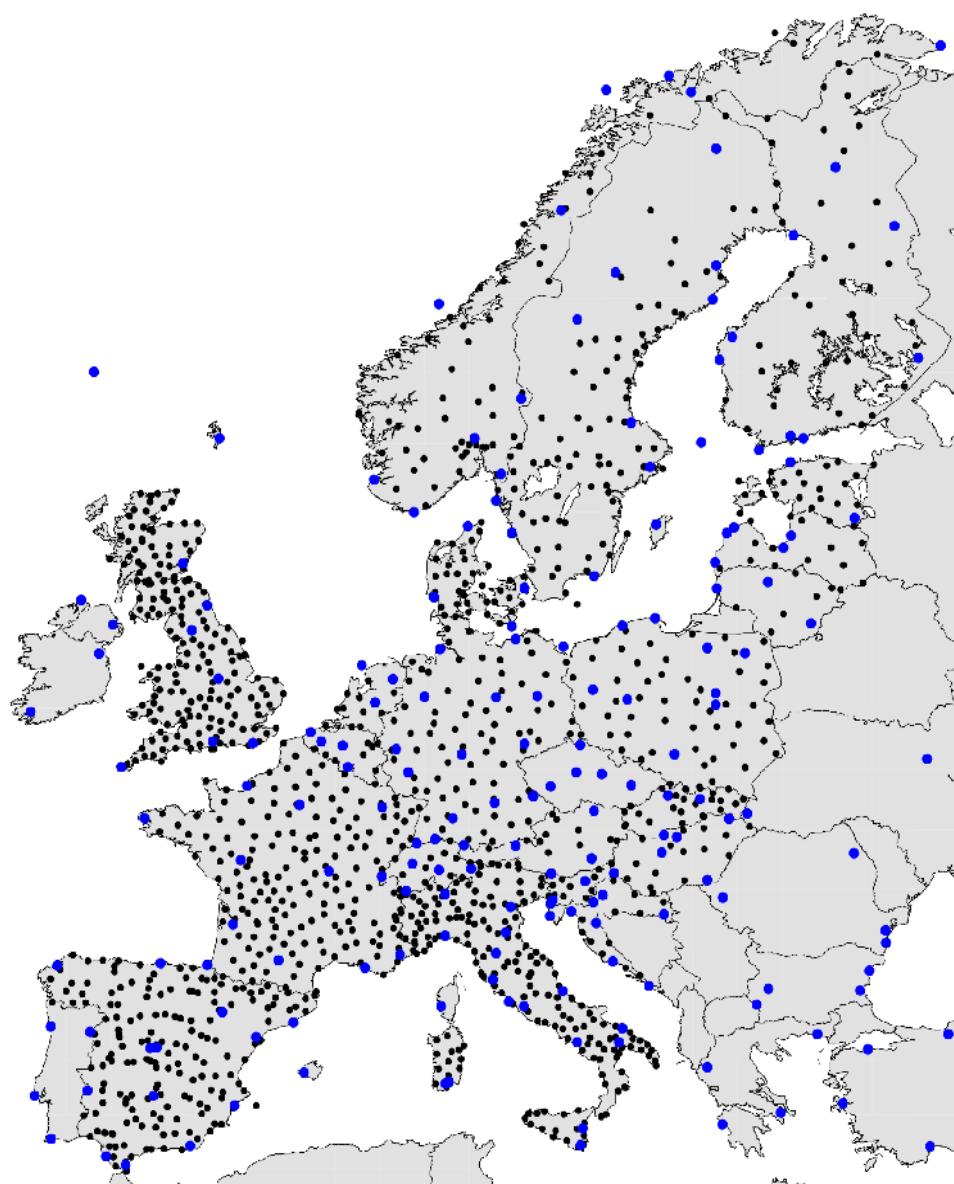

EGG97 and EUVN are not feasible to

- separate data and reduction shortages
 - precisely model the observed differences and create a combined height reference surface

new EGG and densified GPS/leveling network is needed

EUVN_DA

CONTINENTAL HOMOGENEOUS GPS/LEVELING DATABASE

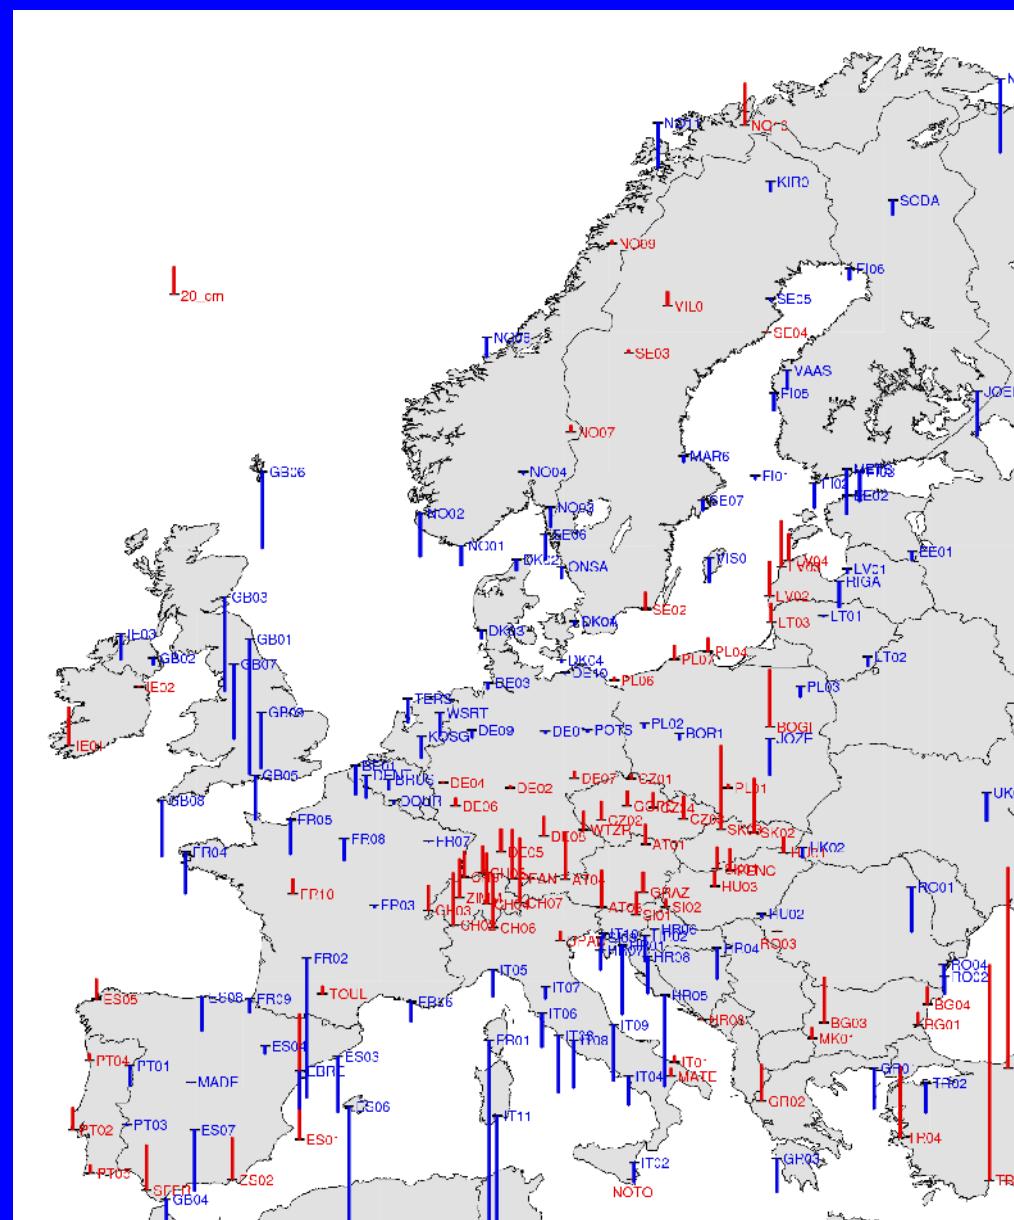

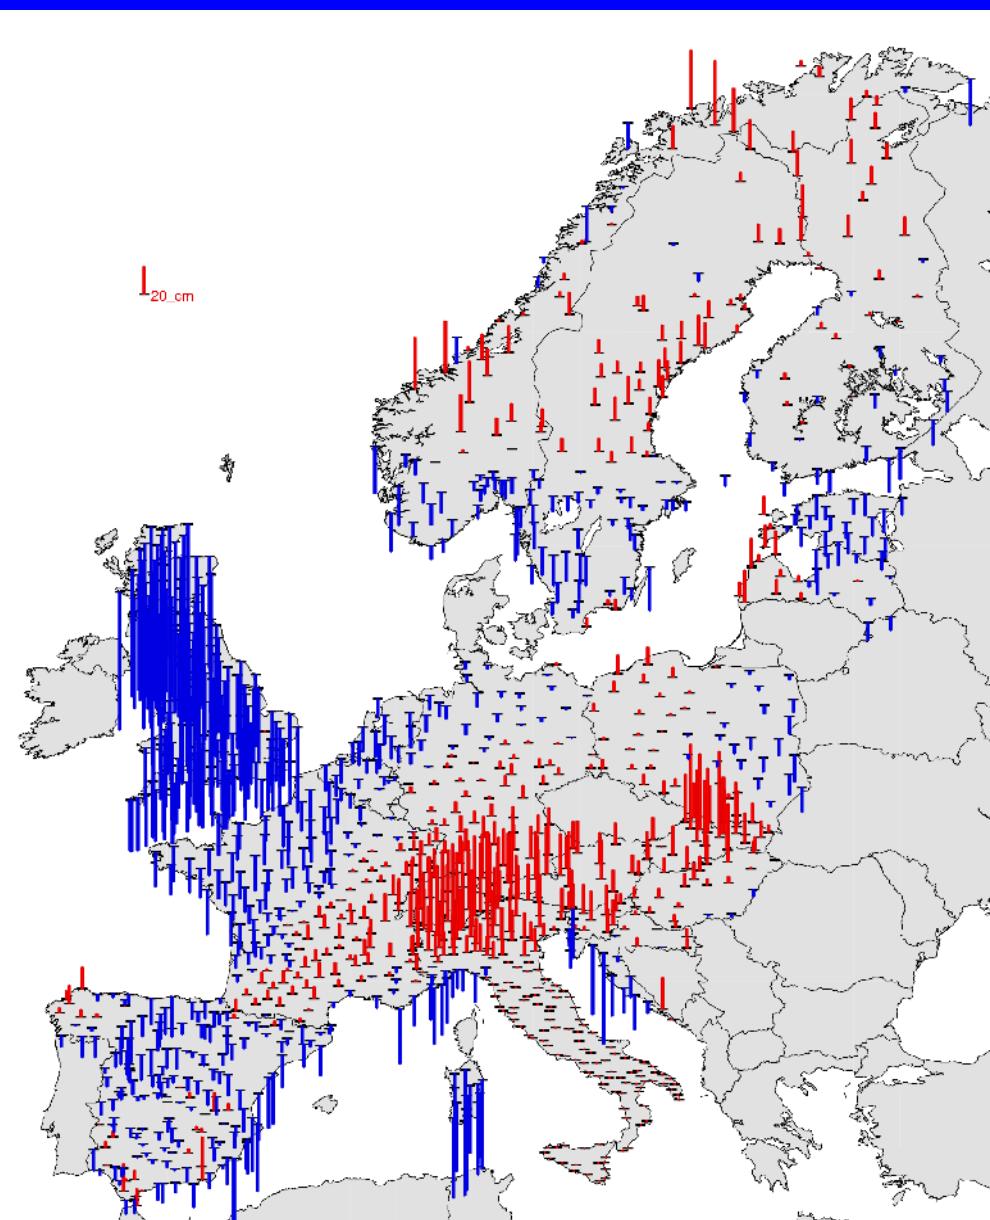

- Collection of >1200 existing and new high quality GPS/leveling points
- GPS: 24h; scientific processing
leveling: UELN & gpu
- common reference frames
 - leveling: UELN/EVRS2000
 - GPS: ETRS89/GRS80
- common reference epoch ?
epoch of observation (UK, Spain!)
- Nordic countries: 2000.0
- land uplift modeling: NKG2005LU
- project time frame: 2003-2007

EUVN_DA – EGGyy comparison statistics

	# of pts	RMS [cm]			MAX-MIN range [cm]		
		EGG97	EGG03C2	EGG06	EGG97	EGG03C2	EGG06
Austria	17	11	6	5	33	19	17

EGG032C2: EIGEN03C + marine data upgrade
 EGG06: terrestrial data for C Europe upgraded

EGG97 wrt EUVN_DA EUVN

EGG97 wrt EUVN_DA

clear LW trends

France, Scandinavia

GB: offset and strong tilt

UELN connection?

Alps and High Tatras

geoid or leveling?

Mediterranean coastline

?

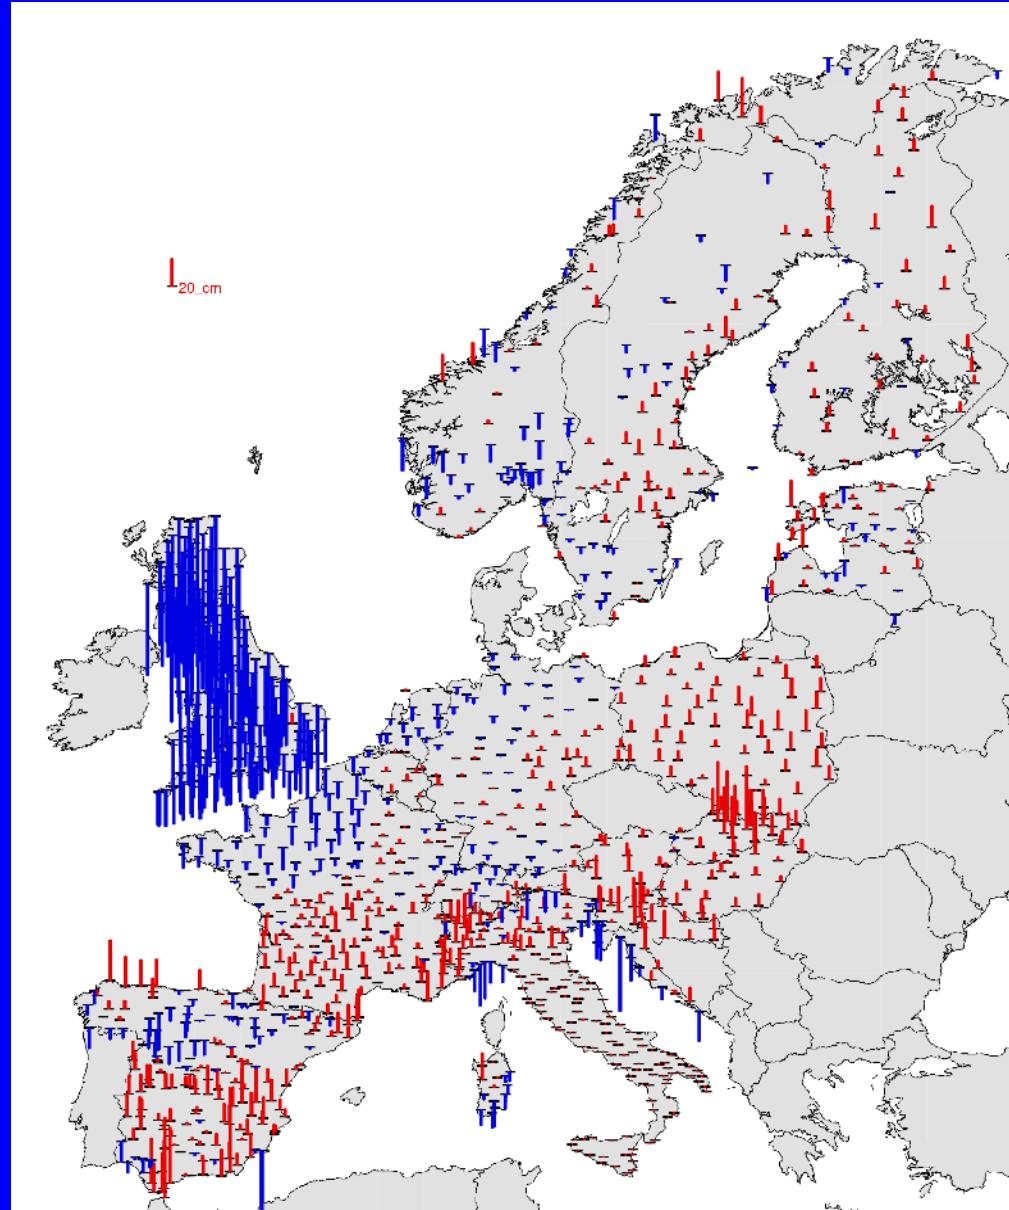

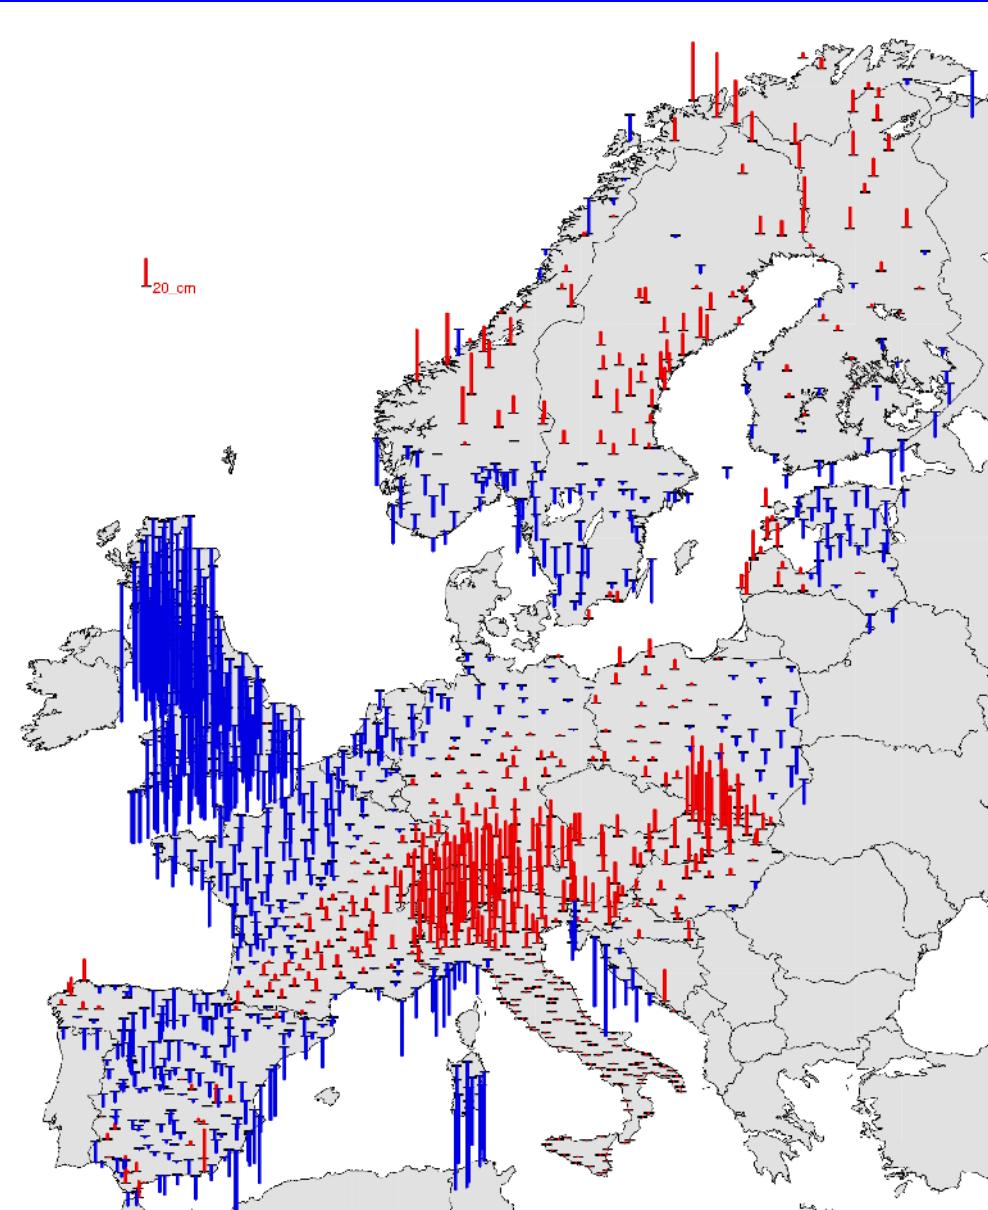

Spain: higher scatter

old leveling

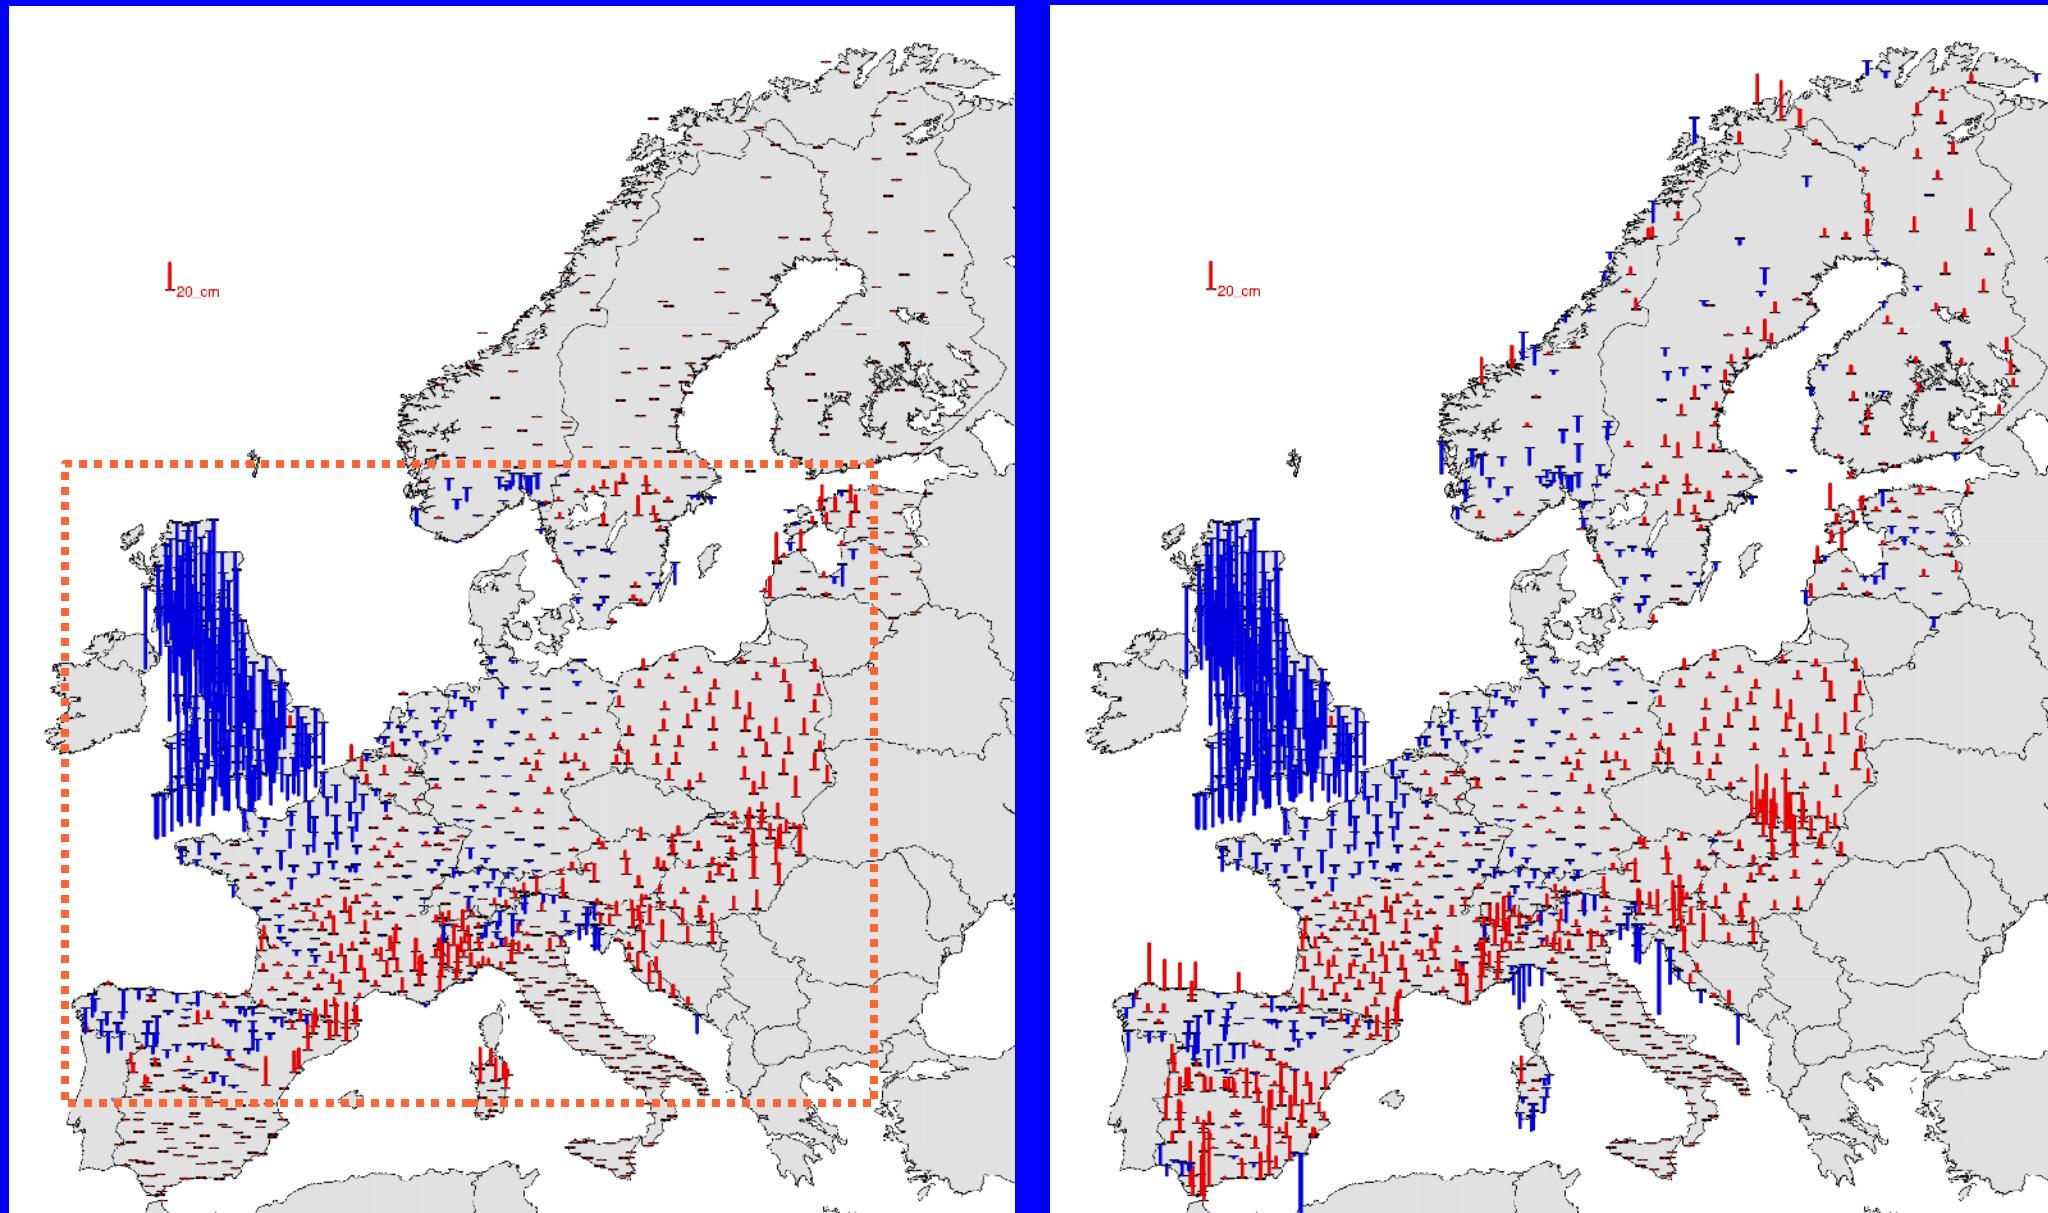

Sardinia: height datum?

(Italy: data not validated)

EUVN_DA wrt EGG97 EGG03C2

EUVN_DA wrt EGG06 EGG03C2

SUMMARY

- the build-up of a regional GPS/leveling database is in progress
- >1200 sites from 20 + 5 countries (missing: SE Europe)
- 50 – 100 km mean separation
- cm-accuracy ellipsoidal and levelled heights
- unified reference frames : ETRS89/UELN
- the presented preliminary tests show good agreement with the new EGG solutions (< 10 cm rms, +- 10 cm residual)
- further iteration and validation is needed to refine the current status

OUTLOOK

- the 1st version of EUVN_DA should be ready in 2007
- EUVN_DA is exclusively for scientific purposes
- the database should be capable for
 - ➔ studying leveling networks on national and continental level
 - ➔ validation of global geopotential models
 - ➔ analyzing the follow on EGG solutions
 - ➔ supporting the realization of an accurate continental height reference surface

SPECIAL THANKS TO THE DATA PROVIDERS

• Austria	N.Höggerl	BEV
• Belgium	P.Voet	NGI
• Croatia	B.Barisic	HGI
• Estonia	K.Kollo	Maa amet
• Finland	M.Ollikainen	FGI
• France	F.&H.Duguenne	IGN
• Germany	M.Sacher	BKG
• Great Britain	C.Fane	OS
• Hungary	G.Virág	FÖMI
• Italy	M.Pierozzi	IGM

SPECIAL THANKS TO THE DATA PROVIDERS

• Lithuania	E.Parseulinas	VTU
• Netherland	A.Kösters	Rijkswaterstaat
• Norway	O.Vestol	SK
