

EPN real-time activities

W. Söhne

Bundesamt für Kartographie und Geodäsie
Frankfurt am Main, Germany

- **New or changed EPN RT data streams since last TWG**
 - **LAMA (RTCM 3.0)**
 - **OSLS (RTCM 3.0)**
 - **STAS (RTCM 3.0)**
 - **SULP (RTCM 2.3)**
 - **TERC (RTCM 3.0)**
 - **TRDS (RTCM 3.0)**

- **RTCMv3 new messages for satellite clock and orbit corrections under development and discussion**
 - **Message type 1057: GPS orbit corrections to BRDC**
 - **1058: GPS clock corrections to Broadcast Ephemeris**
 - **1059: GPS code biases**
 - **1060: combined orbit and clock corrections to GPS BRDC**
 - **1061: GPS User Range Accuracy**
 - **1062: high-rate GPS clock corrections to BRDC**
 - **1063-1068: same for GLONASS**

- **BKG/TUP (GPS; GPS+GLO), DLR and GEO++ currently broadcasting selection of these messages**
- **Orbit & clock combination in Post-Processing**
 - **with contributions of BKG (2x), DLR, ESA (2x), NRCan, and GMV**
 - **RMS of 0.2 ns between RT and IGR clocks**

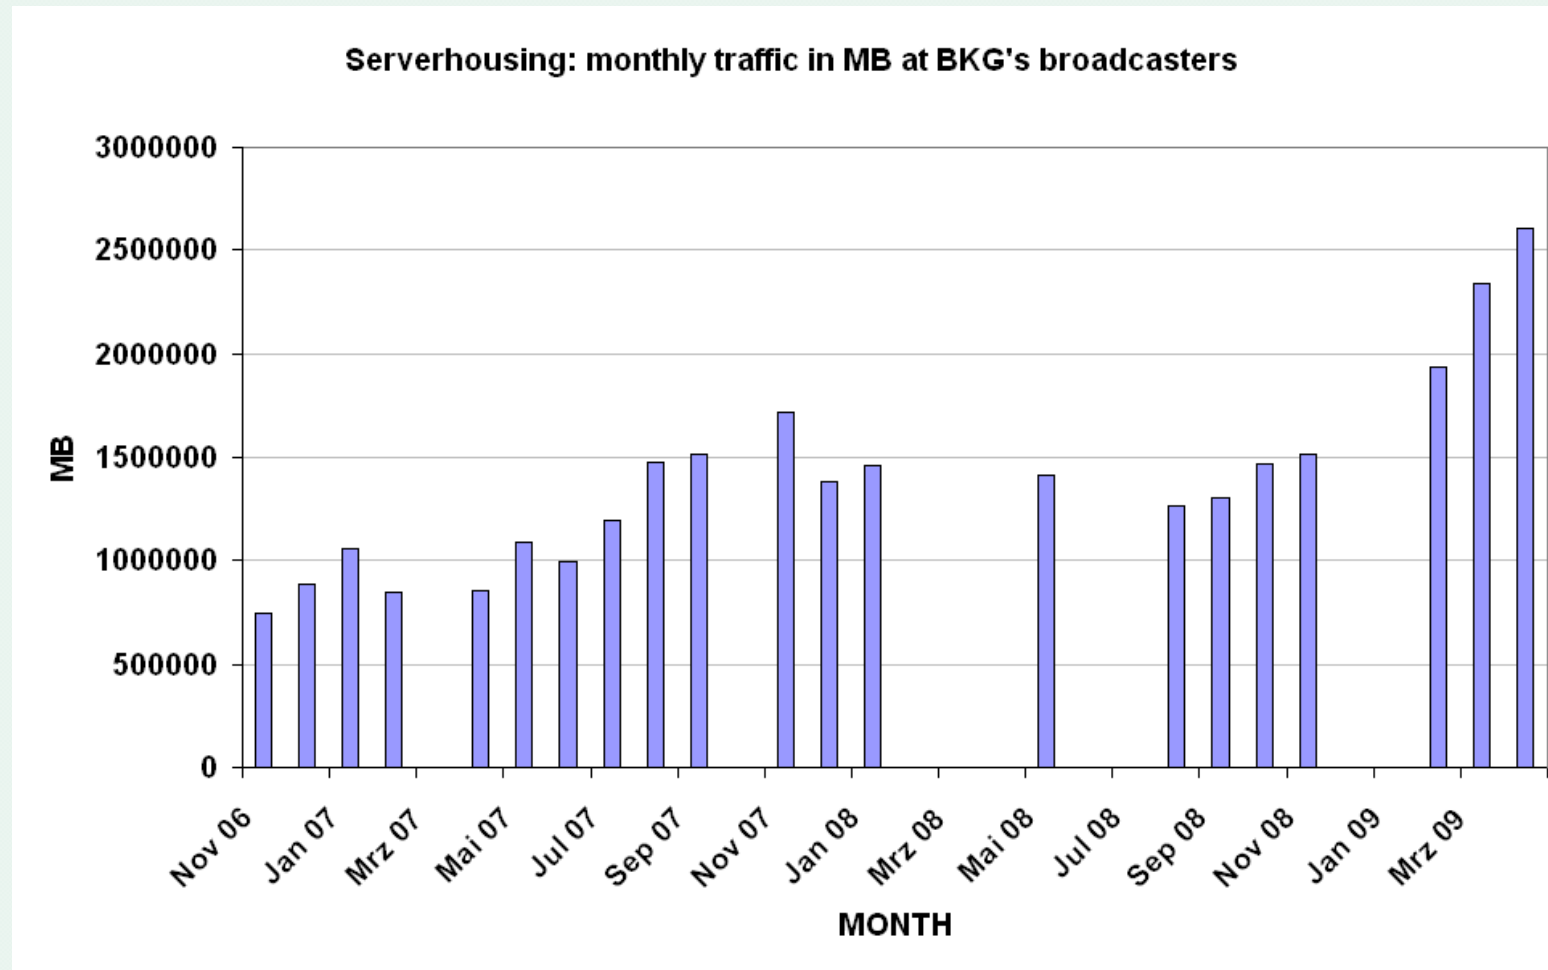

➤ Action Items from last TWG

- Include section „Objectives“ with link to draft paper ✓
- More details for „Call for Participation“ items ✓
- Improved version to circulate among TWG members ✓
- EUREF mail pointing to the new SP/ new webpage (✓
March, 13 (4259))

➤ **Call for participation**

- **Re-dissemination of GNSS real-time data and products in Europe via NTRIP Broadcasters**
- **Validation of clock and orbit correctors to Broadcast Ephemeris**
- **Backup for all critical real-time service components**

- Number of registered users since last TWG: +60
- Data volume (up-, download) in MB

➤ Dissemination concept and guidelines

Objectives.....→	1¶
Status of usage.....→	1¶
Structure of NTRIP broadcaster network.....→	1¶
Top-level NTRIP broadcasters.....→	1¶
NTRIP Caster relays.....→	2¶
Authorization procedure.....→	2¶
Authorization policy.....→	3¶
Requirements for operating an NTRIP Broadcaster in support of IGS/EUREF.....→	3¶

➤ Dissemination concept and guidelines

➤ **Dissemination concept and guidelines**

- **Minimization of “single point(s) of failure”**
- **Targets for the required capacity of a broadcaster (bandwidth, data volume, software, hardware, costs, etc.)**
- **Estimation of evolution for the next few years**
- **Coming up with a number of necessary broadcasters to fulfil the needs of the community for the next years (avoiding the need for third-level?)**
- **From “single station – single stream” to “single station – multiple streams” (receiver software, internet connection, etc.)**
- **Starting with from “single caster – multiple (relay) casters”**
