Detail Discussion

G. Stangl

EUREF TWG Meeting Gaevle 2010

- **Check prototype at**

  ftp://olggps.oeaw.ac.at/pub/EUREF_camp/EUREF_campaigns_test.html

  - **Placemarks for each campaign**

  - **Within tag reference to further information (application paper, SINEX files etc., if submitted)**

  - **Some special campaigns (EUREF 89, EUVN97, Balkan campaign) with different placemarkers**

  - **One page for accepted campaigns, one for campaigns to be accepted (also playing grounds for info extraction, like tables**

Deliverables

- Campaigns before 2007 delivered only (not always)

- - Report

- - Station info concerning names, coordinates, accuracies

- Information may be lost

- Campaigns since 2009 should deliver

- - Report

- - Site description (station logs)

- - SINEX file of coordinates, free network and minimally constrained

- - Coordinate and velocity (if applicable) list in ITRF

- - Coordinate and velocity (if applicable) list in ETRF

- - Fiducial sites with coordinates and velocities used

Discussion about Necessity

- No request by EUREF for public use of sites anymore

- No limitations of the number of sites by EUREF anymore

- Metadata may not be delivered from private sites (Czech campaign), reducing information to site name and equipment

- EUREF site information will be updated at no time, concerning equipment and behaviour

- Is it useful to repeat the site information outside the report?

- The validation of campaigns by EUREF is restricted to the procedure only, no site information would be necessary therefore

- **Proposals:**

- **Drop the deliverable Site Description in the guidelines**

- **No EUREF database for sites, publish the digital reports**
