EUREF Campaigns
Web Presentations
Data submitted

G. Stangl

Google Maps Solution

- **Presently extractable data at**

  ftp://olggps.oeaw.ac.at/pub/EUREF_camp/EUREF_campaigns_google.html

  - **Placemarks for each campaign**

  - **Within tag reference to further information (application paper, SINEX files etc., if submitted)**

  - **Campaigns Italy 2008, Greece 2009, Latvia/Lithuania 2005, partially UK/EIR 2009, Czech 2009**

  - **Sites with Names, Location, ETRF coordinates, equipment, link to campaigns**

  - **Other meta-information, if provided**

  - **IGS-log sheet example 001A linked**

Deliverables

- Deliverables according to new guidelines not all yet delivered (UK/EIR, Czech very late)

- Coordinates and meta-data retrieved from reports, probably check against SINEX files necessary

- Older campaigns no digital information yet

- Problem of site velocities :

- - Not a EUREF-confirmed product in campaigns

- - May double confusion of different values in the same ITRF/ETRF realization

- - Some campaigns with, some without individual site velocities

Discussion about Site Presentation

- No site can be used again by others than the owner and related organizations -> web presentation is more a documentation and has no importance for the future (except payments are made)

- Huge number of sites per country will require a lot of Google pages when looking for the site names instead of the placemarkers

- How much information should a placemarker contain? All available meta-data, or only links? Presently the most important information can be seen, others only as links
