

EUREF RINEX3 transition plan

E. Brockmann, C. Bruyninx,
W. Soehne, G. Stangl

RINEX3 + Long Names

- RINEX3 format for Multi-GNSS usage
- IGS established new name structure for RINEX3 files (=Long Names)
- Intended to be implemented 2015
- Requires additional work for data providers, DCs and users
- **Question: How to proceed?**

Proposed Actions

Data Providers

- Encourage OCs to submit additional RINEX3 data
- Encourage to submit long name files
- Refer to IGS mail (forthcoming)

Data Centers

- Prepare routines for including RINEX3 long file names
- Prepare check routines for submitted files
- Decide how to handle format errors and file name errors

Timeline for Actions

- ◉ Proceed with discussions within the TWG until next TWG
- ◉ DCs should submit new .DC sheet including how to handle RINEX3 long names until next TWG
- ◉ Wait for IGS recommendation and invitation to data providers (Autumn 2015?)
- ◉ Update DC guidelines before next EUREF Symposium
- ◉ Presentation and resolution at the next EUREF Symposium
- ◉ Implementation and practical experiment in 2016
