Conclusions

- LKS92 framework is an ETRS89 realization in Latvia. It has been applied during 20 years for cadastre and mapping.
- Time series of LATPOS and EUPOS-RIGA networks calculated in ETRS89 framework.
- Helmert transformation parameters are calculated to convert LKS92 coordinates in ETRS89 and otherwise.
- The antenna calibration effect is one of the reasons for LATPOS and EUPOS-RIGA transformation parameters.
