# REVIEW OF AREC

## National Cadastral and Mapping Agency

Founded in 1947 as Republic Geodetic Authority,  
later State Authority for Geodetic works, now Agency for Real Estate Cadastre

- The Agency for Real Estate Cadastre (AREC) is an entity of the state administration authorized for:

- basic geodetic works
- survey
- cadastre
- registration of the real property rights
- maintenance of the survey and the real estate cadastre

- cartographic production
- establishment, maintenance, public display of the NSDI
- establishment and maintenance of the spatial unit registry ...

## Department for Geodetic Works:

- Unit for geodetic networks, survey, and land classifications
- Unit for photogrammetry
- Unit for cartography

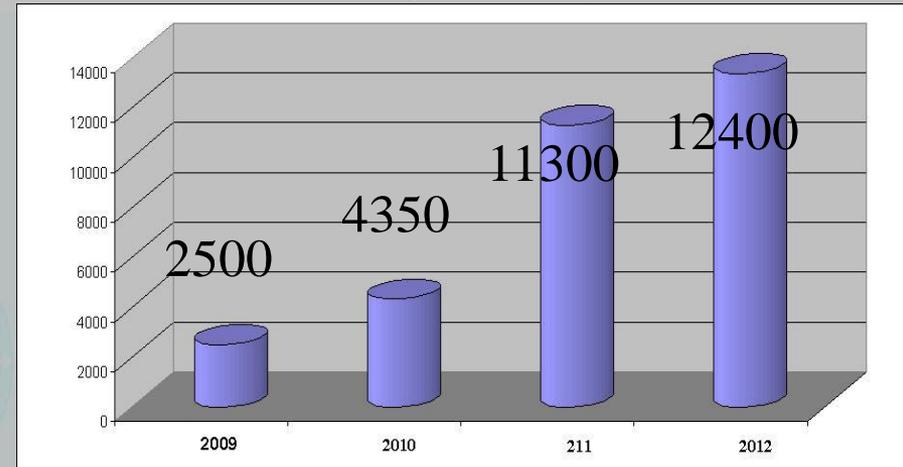

## Responsibilities:

- Establishment, maintenance and development of geodetic reference networks (trigonometric, network of permanent GNSS stations, passive GNSS network, levelling network, gravimetric network etc ...)
- Maintenance and marking of the Macedonian state border
- Geodetic works of special importance for R. Macedonia
- Geodetic survey
- Land classifications
- Production of digital topographic maps and Ortophoto productions

# ACTIVE GNSS NETWORK - MAKPOS

Working hours / year

Status May, 2013

- Registered companies: **121**
- RTK rover users: **138**
- DGNSS rover users: **10**

# INTRODUCTION OF NEW COORDINATE SYSTEM

- **DEFINITION**

Choice of new optimal coordinate system.

The optimal choice represents **ETSR89**

- **REALIZATION**

- Active GNSS network - MAKPOS *14 stations*
- Passive GNSS network ~ *200 points*

Realization done  
from 2008 - 2011

- **LEGISLATION**

- Change of law and regulations needed

Planned in 2014

**Introduction of ETRS89 in official use in MACEDONIA planned for 01.01.2015**

# COORDINATE TRANSFORMATION PROJECT

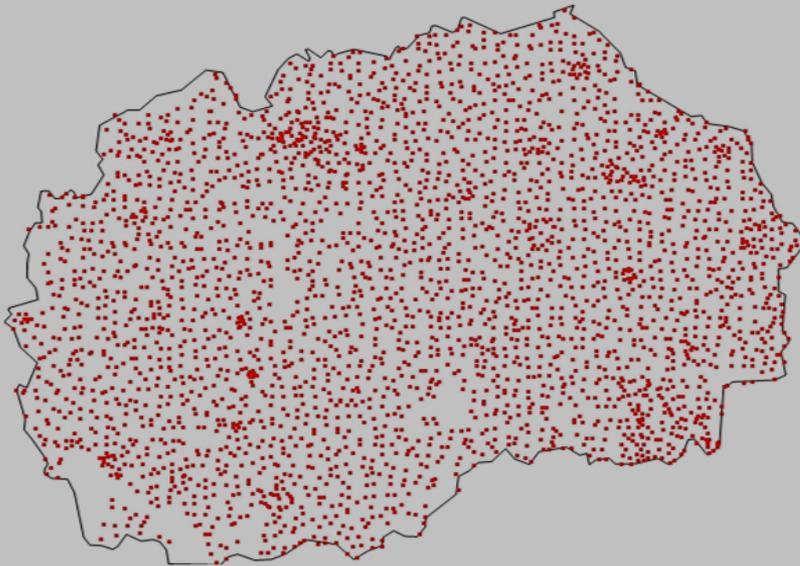

- **TRANSFORMATION MODEL** → Seven parameters Helmert similarity transformation + Making grid of residuals

- **REALIZATION (from 2008 – 2012)**

- *EUREFMAKPOS '2010 (14+7+4), total 25 points*
- Passive GNSS network *166 points*
- All order trigonometric network *2600 points*
- City trigonometric network *275 points*

TOTAL 3066

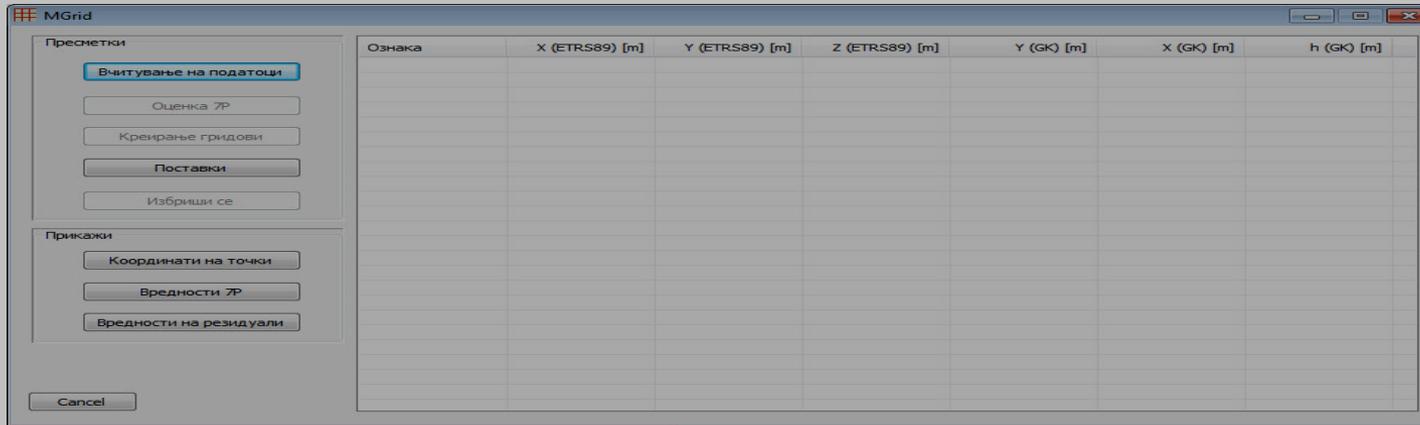

- Density 1 Point / 8 km<sup>2</sup>
- Accuracy ~ 2-3 sm
- Measured/Adjusted - ETRS89

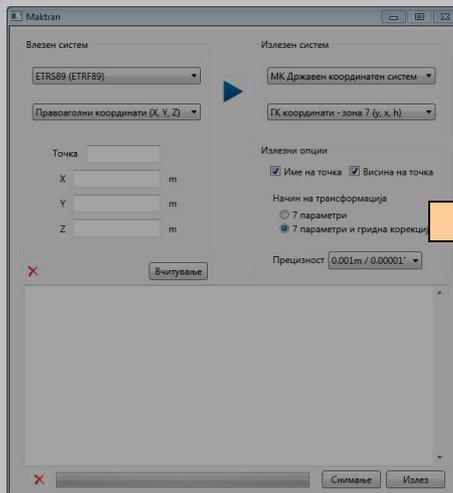

# COORDINATE TRANSFORMATION PROJECT

## SOFTWARE

- **MGRID** (*software for trans. parameters and griding the residuals*)

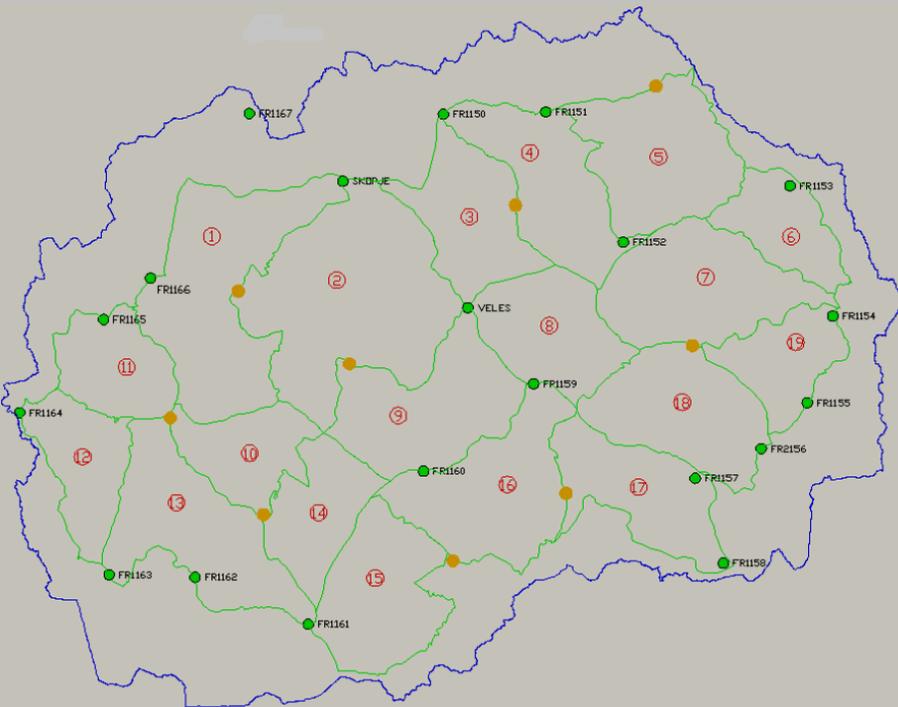

- **MAKTRAN** (*software for transf. of coordinate*)

1. ETRS89 (ETRF89);
2. ETRS89 (ETRF2000);
3. MKD (Old State Coord. System).

# NEW LEVELLING NETWORK

Period for realizations August, 2012 – December, 2013

Status May 2013

Benchmark reconnaissance **80 %**

Benchmark monumentations **75 %**

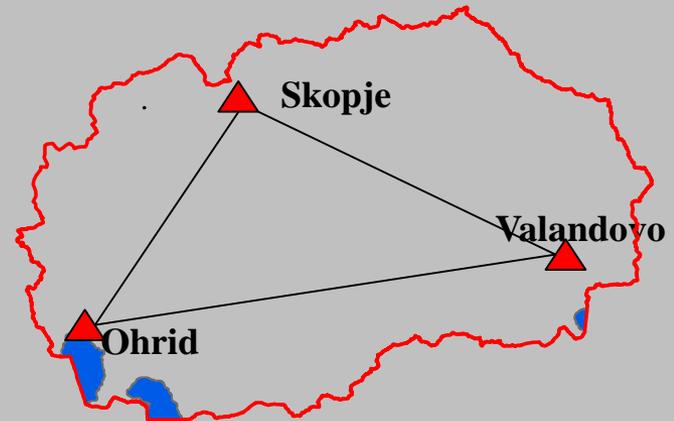

Measurement of leveling lines **40 %**

Total length of lines [km]	2200
Number of polygons	17
Average length of polygons [km]	156
Number of benchmarks – interdistance 2 km	1100

# NEW GRAVIMETRIC NETWORK

## Absolute gravimetric network

- Number of points : 3

## Relative gravimetric network

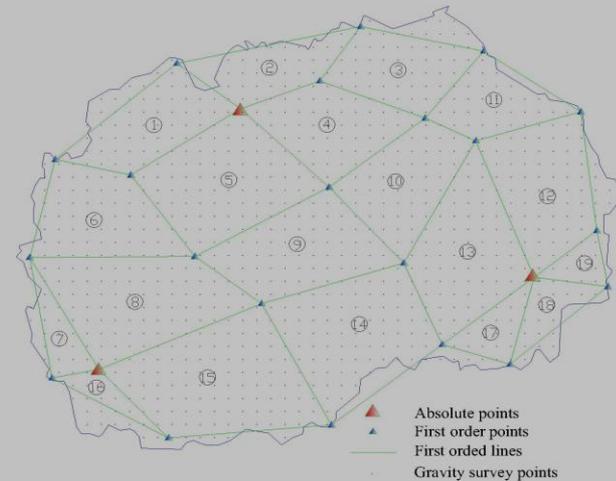

Planned for realization in 2013

- Number of points : 24

## Gravity Survey

Planned for realization in 2014

- Resolution: 3 - 5 km grid
- Number of points ~ 2000

# THANK YOU FOR YOUR ATTENTION
