

POSKEN - THE NEW EUROGEOGRAPHICS KNOWLEDGE EXCHANGE NETWORK

Dave Lovell, SauliusUrbanas

EuroGeographics

06 June 2014

EuroGeographics –Activities

- Representing Member's Interests;
- Exchanging Knowledge -developing capability and capacity;
- Interoperability Projects – one source for reference data for Europe;
- Pan-European Products -your data aggregated and harmonised for use in Europe and beyond.

EuroGeographics Membership

59 members

46 European countries

2 new candidates

Ruedu Nord 76

Noordstraat 76

EuroGeographics' Strategy

2014 - 2020

Strategic Objectives

- 1) Provide the voice of our members
- 2) Develop the network of members
- 3) Deliver an operational ELF to support realisation of the ESDI
- 4) Facilitate access to members' data and expertise
- 5) Grow our network of members
- 6) Ensure that the association continues to develop its role and has a sustainable future

Our purpose is: 'to further the development of the European Spatial Data Infrastructure through collaboration in the area of geographic information, and the representation of the EuroGeographics' membership and its capabilities.'

Our vision is of a European society which makes decisions informed by our members' accurate, authoritative and quality-assured land and geo-information data, services and expertise.

Our Mission is to maintain a network which helps each member to improve their competencies and role; to facilitate access to our members' data, services and expertise; and to provide a strong voice for our members.

Knowledge Exchange Networks - KENs

- Open forum for all members and invited experts
- Focused on topics of interest to our members:
- 2 workshops/year; webinars or e-mail communication, use cases, studies, discussions.
- Each Chaired by a member;
- Coordinating Committee of 7 including chair and one from EGHO;
- <http://www.eurogeographics.org/content/expert-groups-0>

What will aPosKENdo?

- provide the European platform for networking and sharing best practice and expertise in the field of GNSS positioning:
 - maintain a network of experts in the field of satellite positioning and navigation,
 - follow the development of relevant technologies and practices, especially by sharing information on the new technologies,
 - work together on the most effective utilization of Galileo services and the opportunities that arise together with the creation of a European system;

What will aPosKENdo?

- develop common standards, policies and guidelines that require active contribution of experts in different fields:
 - network and service integrity information in RTCM or other commonly recognized standards,
 - guidelines for best practices in RTK/DGNSS surveying,
 - policy for enabling migration of users between individual (national) networks

What will aPosKENdo?

- provide immediate evidence of starting to implement the new EuroGeographics strategy;
- show the commitment to working with other organizations where the members of each organization can benefit

What can PosKEN lead to?

- strengthened cooperation through a formal agreement:
 - provide formal background for mutual cooperation between four organizations, EUPOS, EuroGeographics, Euref, CLGE
 - complement the EuroGeographics cooperation agreement with the PCC, Eulis, ELRA,
 - invite individual experts and other key players of the GNSS domain in Europe to cooperate,
 - complement the EuroGeographics cooperation agreement with EuroSDR,
 - complement the EUREF and EUPOS cooperation agreements with EUMETNET,
 - strengthen relationships by promoting common position of the KEN member organizations towards other international bodies such as UN OOSA (ICG), ESA, GSA, RTCM,

What can this cooperation lead to?

- aim at creating the uniform GNSS services for Europe, under the working name of European Positioning System:
 - extend the common network operations and structure standards (EUPOS domain),
 - provide common tools for management of the networks and/or common products (EUPOS and EUREF domain),
 - promote the actual usage of the recommended common reference frame in all services (EUREF domain),
 - act towards common policy on charges for services provided by NMCA's, coordinate legal developments (EuroGeographics domain),
 - strengthen the user segment coordination (CLGE domain).

Because together we
are stronger and
smarter, more
efficient and more
effective.

**Together,
we benefit from each
other**

Thank you!
