Delft University of Technology

Geodetic Infrastructure of the Netherlands

- National Geodetic Infrastructure by :
Cadastre, Min. of Infrastructure and Environment, Navy,
Delft University
- Common projects
 - AGRS.NL operation, control & maintenance
 - 1st order gravity measurements
 - Vertical Reference Frame for the Netherlands Mainland, Wadden Islands and Continental Shelf
 - Reconnaissance to phase out *stelsel van de Rijksdriehoeksmeting* (RD)
 - PCTRANS 5 transformation software

Official collaboration Geodetic Infrastructure

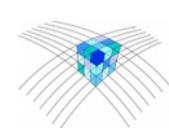

kadaster
GEO samenwerking

XY, Z

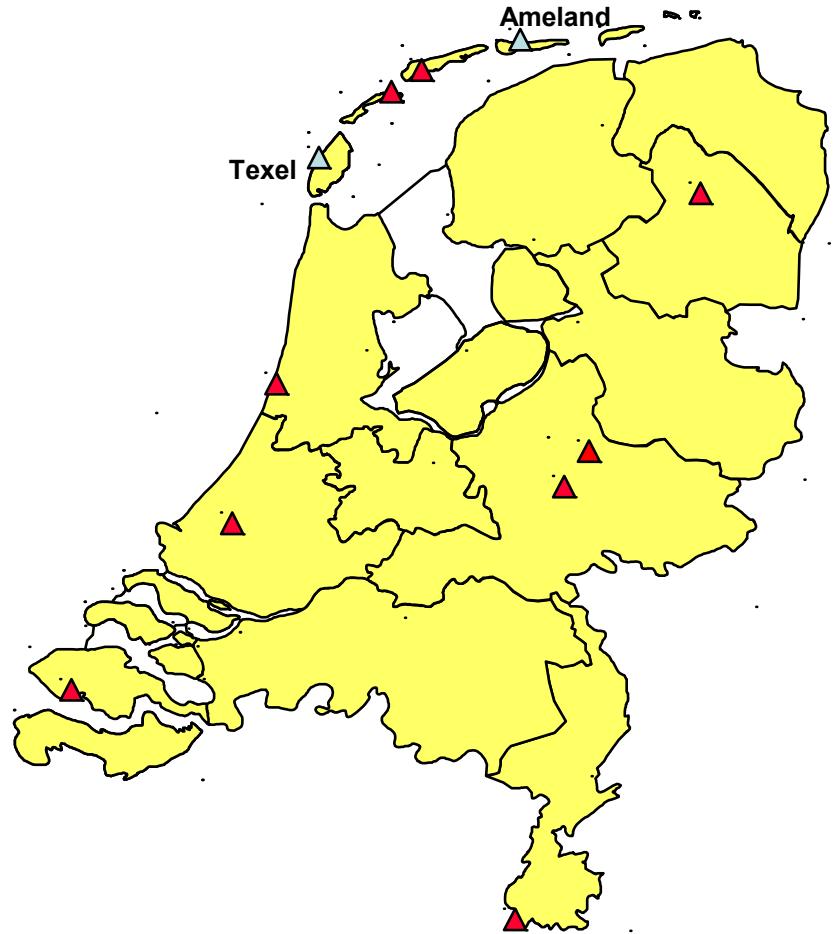

Rijkswaterstaat
Ministerie van Infrastructuur en Milieu

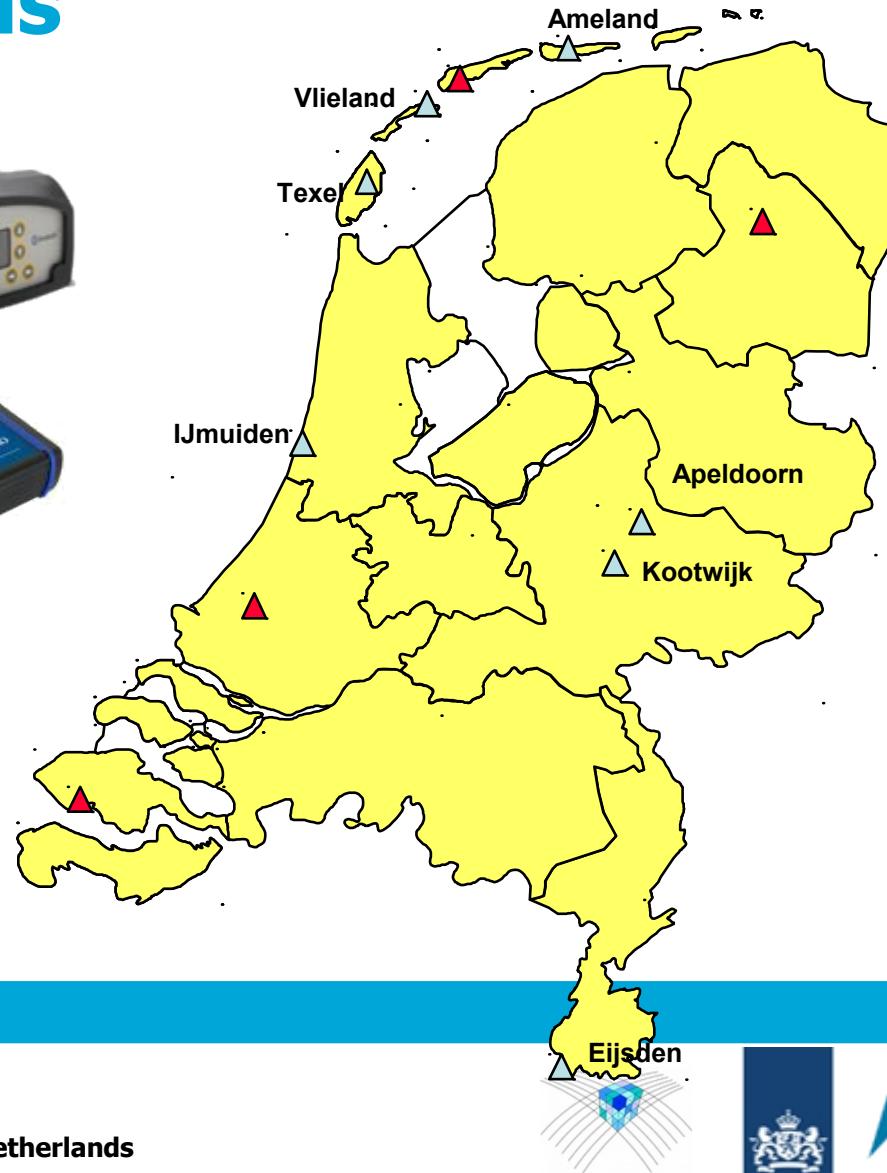

TU Delft

New stations on islands

- Receivers on Islands
 - TXE2
 - Tide gauge
 - Gravity (?)
 - First order height benchmark
 - AMEL
 - First order height benchmark

Triple frequency receivers and antennas

Contribution to euref-ip

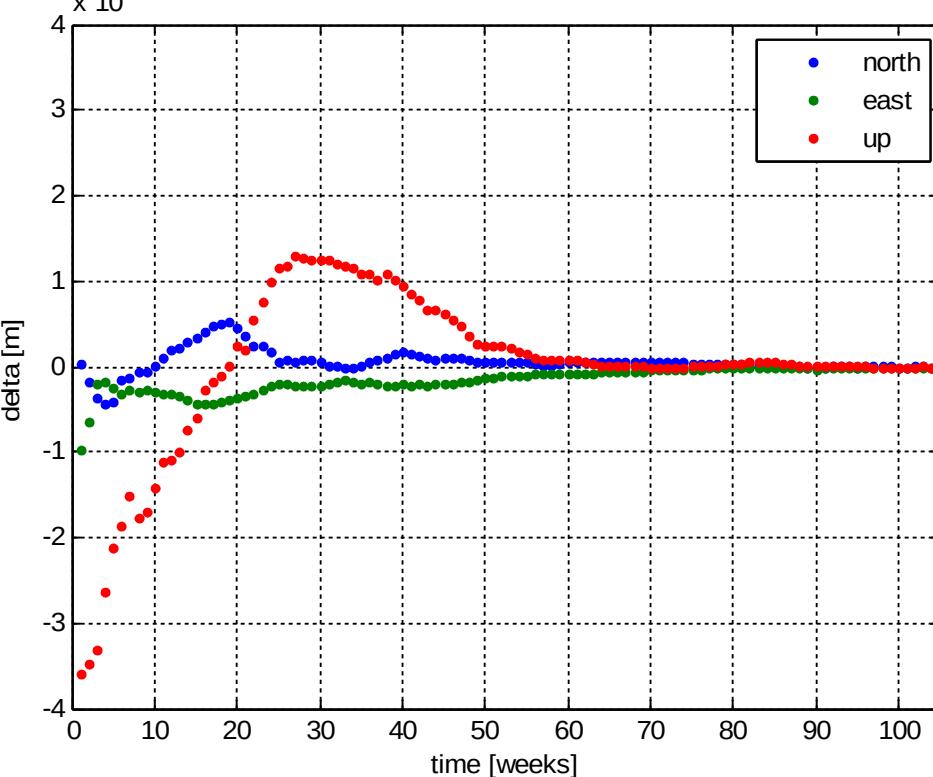

Antenna changes: Convergence of coordinates

- Convergence of cumulated weekly solutions for previous antenna changes

Station	Year of jump
DELFI	2000
TERS	2000
DSN	2000

Figure: DELF comparison to two year combined solution

Antenna changes: Effect of mount on calibration

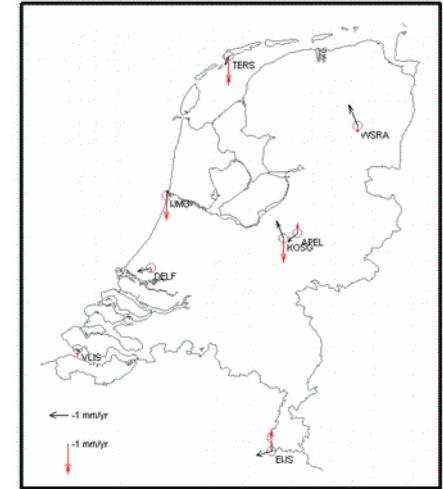

- 50 mm stainless steel mount
- Calibration with and without mount
- Simulation and static/kinematic processing (BSW5.0)

	S	H		
Simulation				
BSW static				
BSW kinematic				

New ETRS89 coordinates for AGRS.NL

GNSS – local time series

- Antenna change (APEL)
 - 2014 expected: EIJS, IJMU, TERS, VLIS
- New station (KOS1)
 - 2014 expected: DLF1, AMEL, TXE2
- Tilting station: TERS

Local time series

GNSS time series (ETRF2000)

- Strategy to deal with above coordinate changes:
Helmert transformation to epoch 2010.5

Thank you for your attention
