

# CLGE supports an enhancement of Precise Positioning

Danko Markovinović & Jean-Yves Pirlot

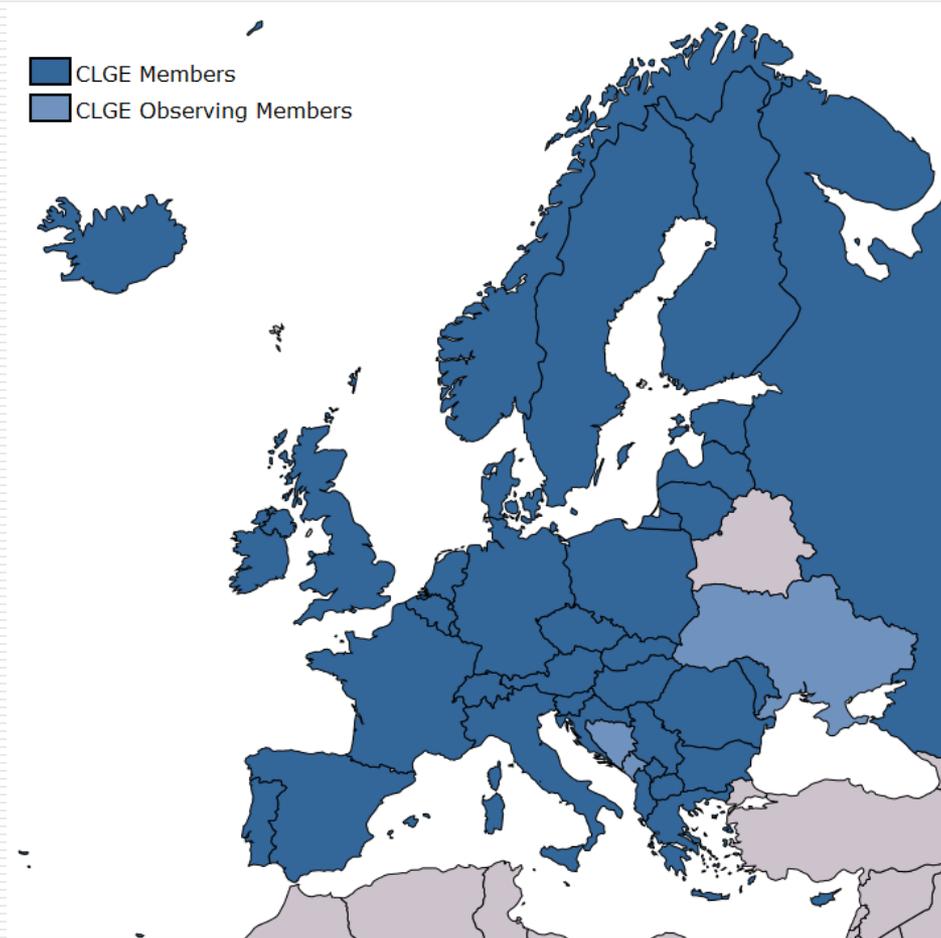

EUREF Symposium, Leipzig June 3 – 5, 2015

---

# CLGE – who we are ?

- principal members (37)
- observers (3)
- honorary members
- represents about 100.000 surveyors

*Rue du Nord 76  
BE - 1000 Brussels  
Belgium*

# CLGE represents and promotes the geodetic surveying profession within Europe

---

- commitment to **cooperation and partnership** within the profession in Europe
  - **exchange of knowledge and expertise between professionals across national and international borders**
  - maintenance and enhancement of **professional qualifications and standards of service** throughout member countries
  - representation of the profession to European authorities and governments
  - **participation in other relevant organisations within Europe and worldwide**
-

# CLGE supports techniques for Precise Positioning

---

- advantages of Precise Positioning are not limited by national territory, but are likewise important throughout Europe
- CLGE officially maintains its demand for a **closer cooperation between the national agencies**
- creation of a European Positioning System

# Umeå Statement

## Recommendations

*“Assess and advertise the technical coordination in the field of geodetic Infrastructure in the EU and neighbouring region”*

*“Improve the user segment coordination and table propositions to the EU and National Authorities”*

# Cooperation with GSA

---

- contribution to the public consultation about the applications of EU satellite navigation programmes (Galileo and EGNOS)
- design of a questionnaire for users of Galileo, EGNOS and Copernicus
- common promotion of the new EGNSS
  - writing the initial market report on which the subsequent reports were based;
  - organizing common events such as the European Space Expo, or the CLGE Students' Contest enlarged to the GSA

# Positioning Knowledge Exchange Network

**PosKEN**

# Representing in PosKEN

---

- **CLGE – users of permanent GNSS networks for precise positioning, especially surveyors**
- EUPOS – DGNSS service providers of RTK networks which densify the continental network
- EUREF – scientific community, especially concerning reference frames and operating a continental GNSS network as densification of the global network of the International GNSS Service (IGS)
- EuroGeographics – national policy makers (NMCA's)

# CLGE in PosKEN

---

- CLGE is strongly in favor of the creation of a Positioning KEN within EuroGeographics
- **common initiative** of the four organizations, i.e. EuroGeographics, EUREF, EUPOS and CLGE
- equal **commitment** from the four partners (CLGE, EG, EUPOS and EUREF) to cooperate on an equal level
- **MoU** as common vision

# Cooperation...

---

- support a common projects
- between neighborhood countries – GNSS network's
- education – users
- to work on quality control
- homogenisation of data
- support young students to work on diploma, PhD thesis...
- to create new set of data on regional level (geoid...)
- meteorological purposes
- producers – create market study
- strong support for economy
- strong support of NMA...

---

*Thank you*
