

EUREF 2004 Symposium

National Report of Austria

by Norbert Höggerl

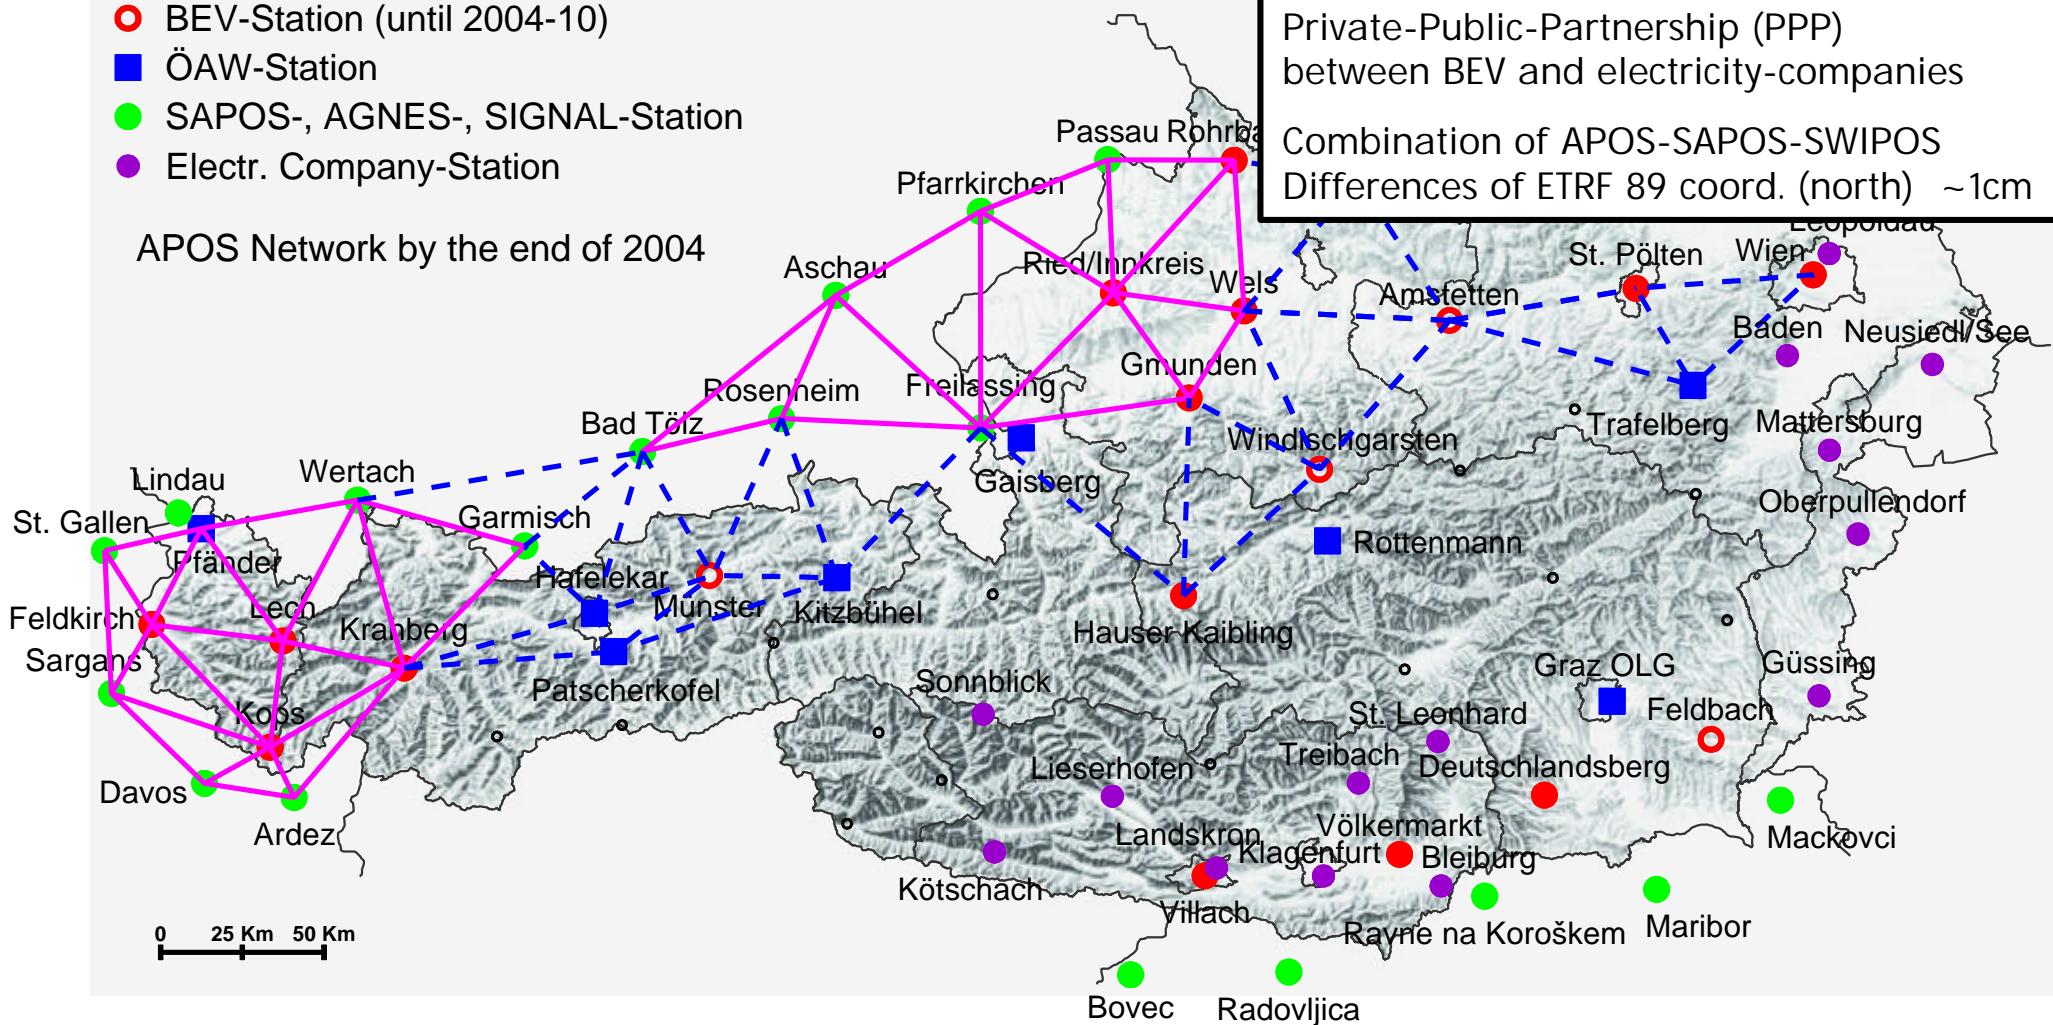

Bratislava, Slovakia

June 2nd to June 4th, 2004

APOS - Austrian Positioning Service

- BEV-Station
- BEV-Station (until 2004-10)
- ÖAW-Station
- SAPOS-, AGNES-, SIGNAL-Station
- Electr. Company-Station

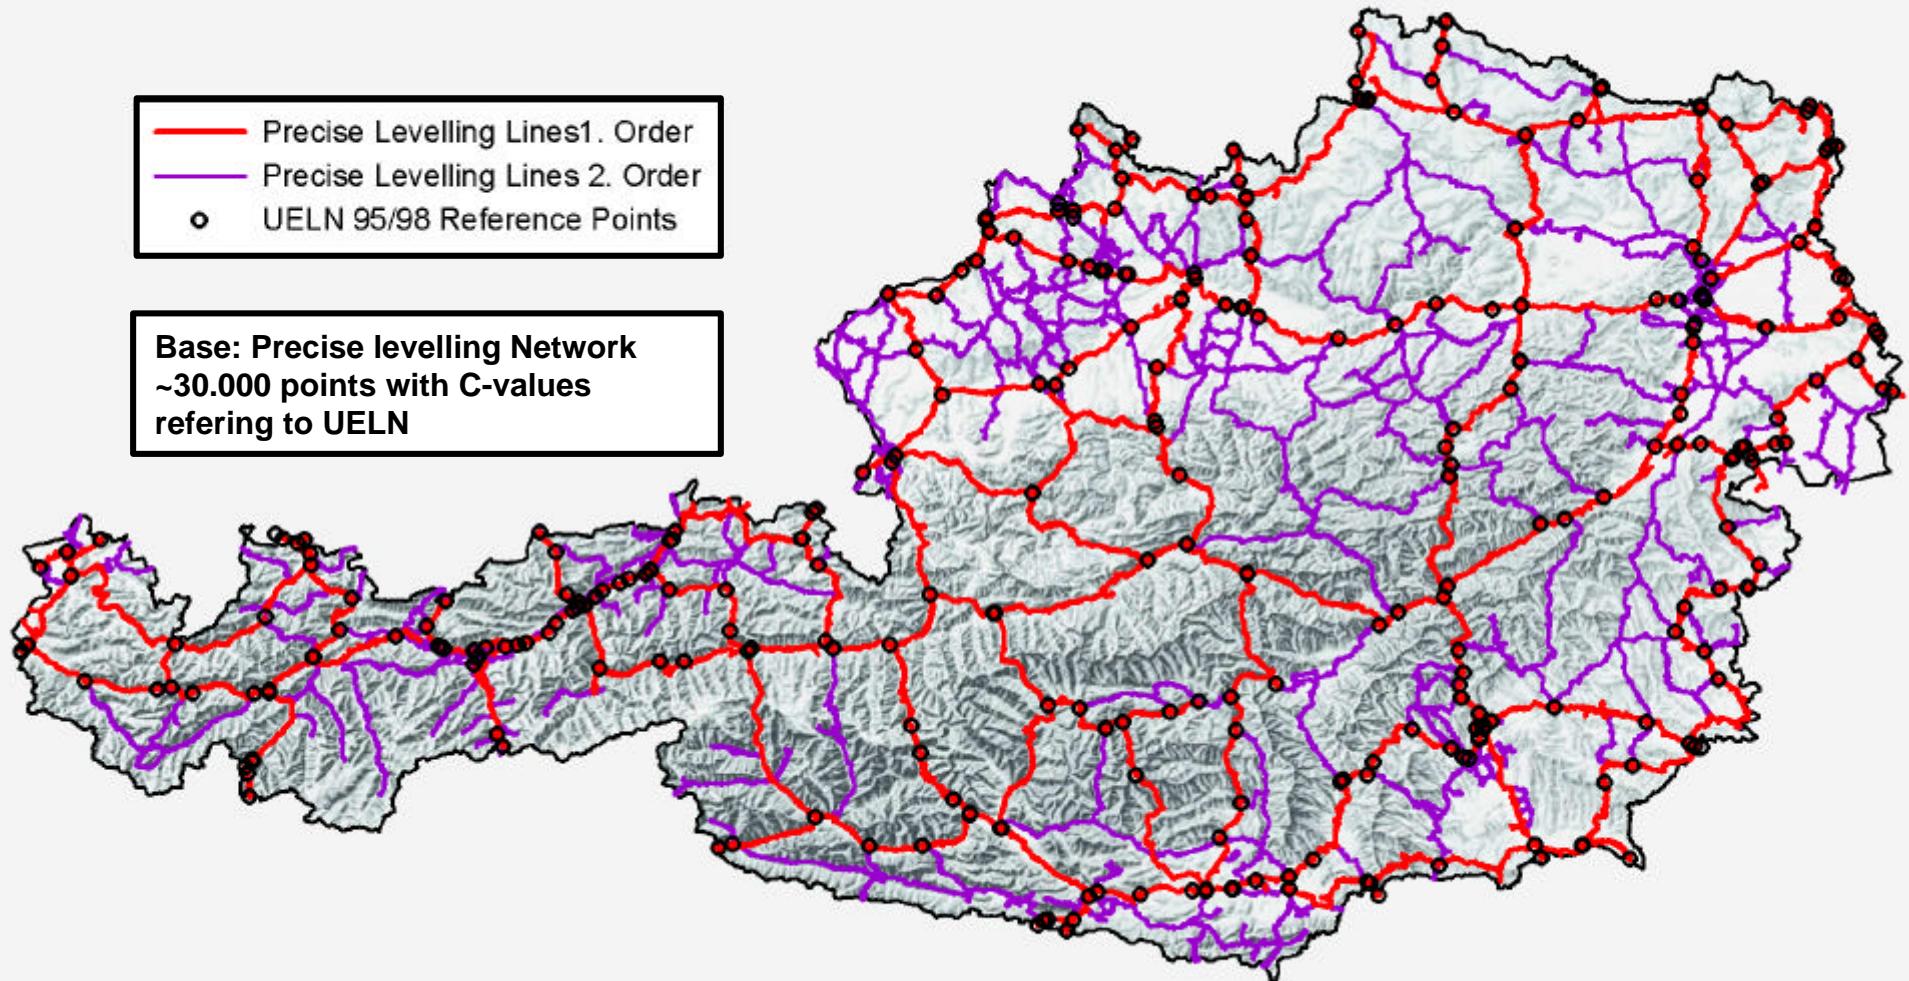

APOS Network by the end of 2004

Transformation of National Heights into Normal Heights by use of BKG-formula

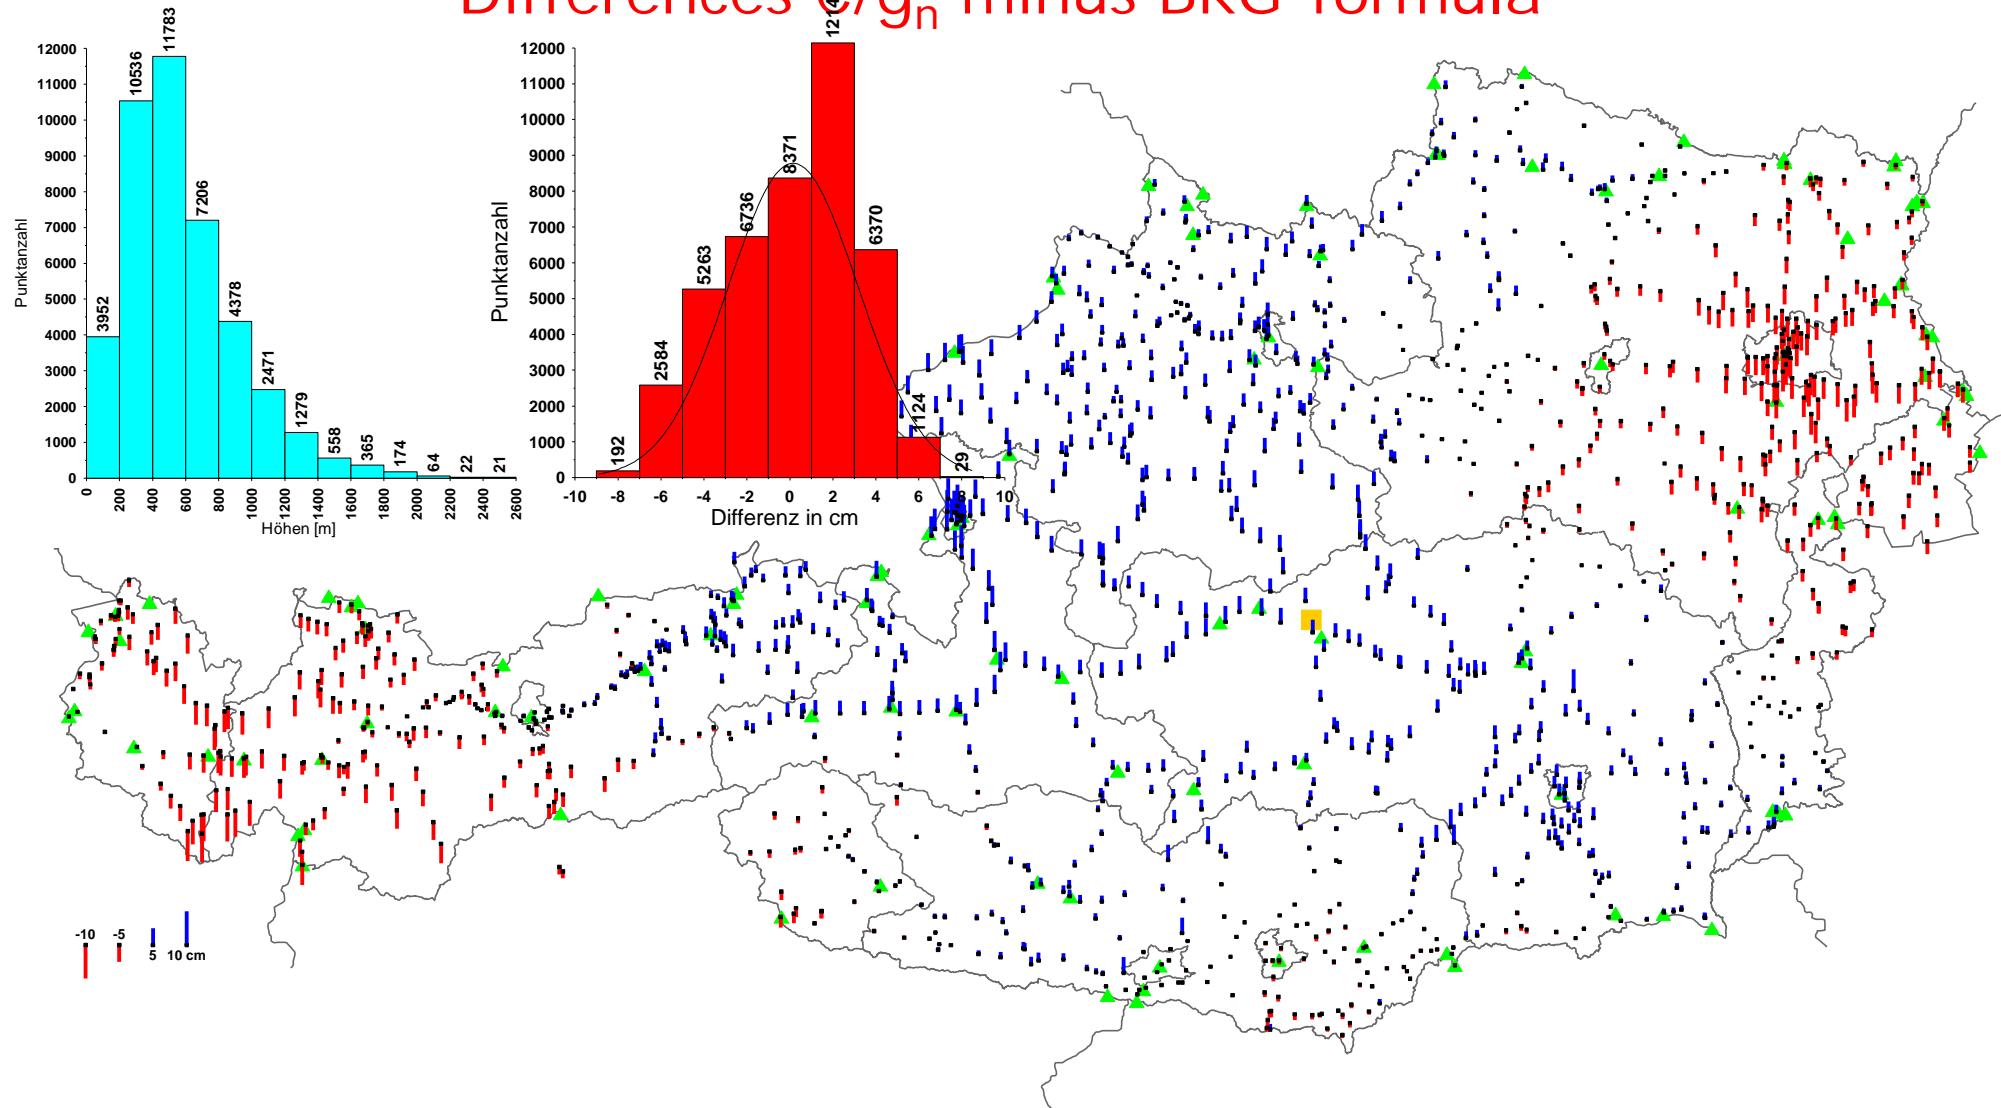

- Precise Levelling Lines 1. Order
- Precise Levelling Lines 2. Order
- UELN 95/98 Reference Points

Base: Precise levelling Network
~30.000 points with C-values
refering to UELN

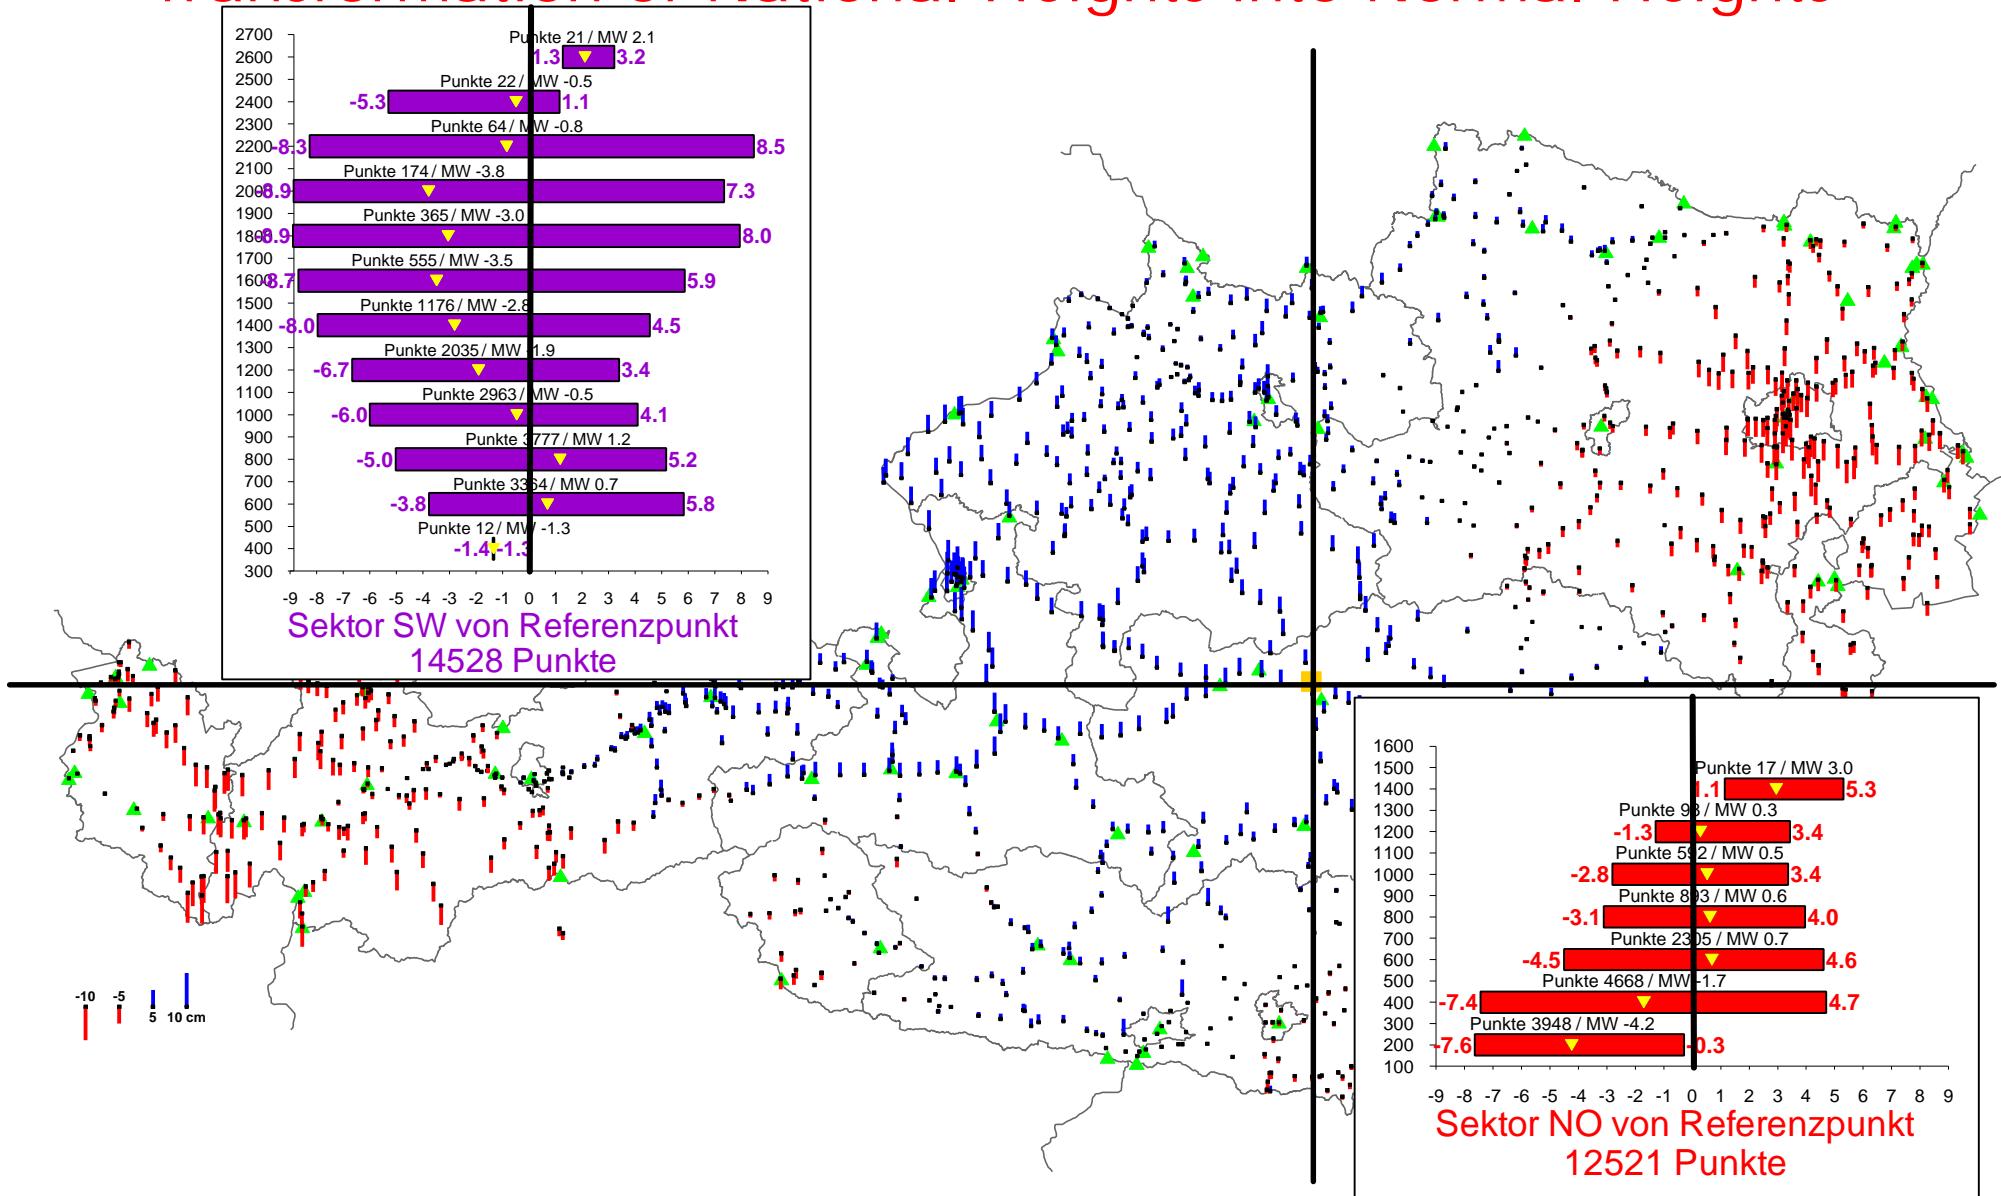

Transformation of National Heights into Normal Heights

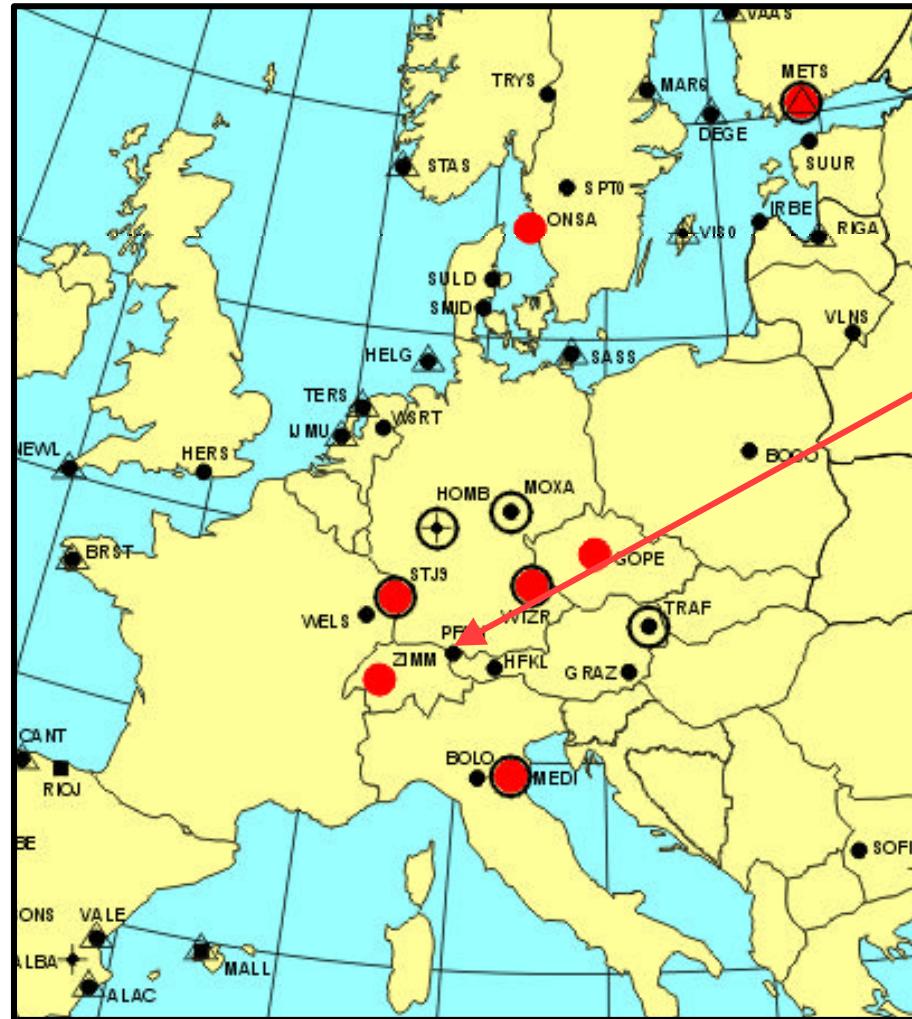

Differences C/g_n minus BKG-formula

Transformation of National Heights into Normal Heights

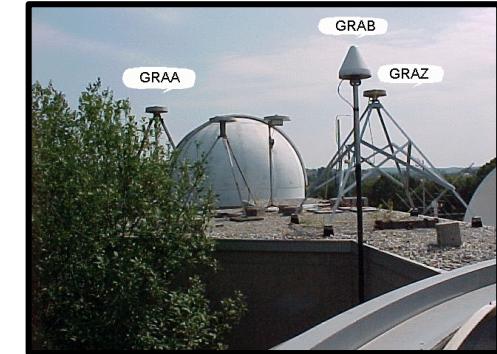

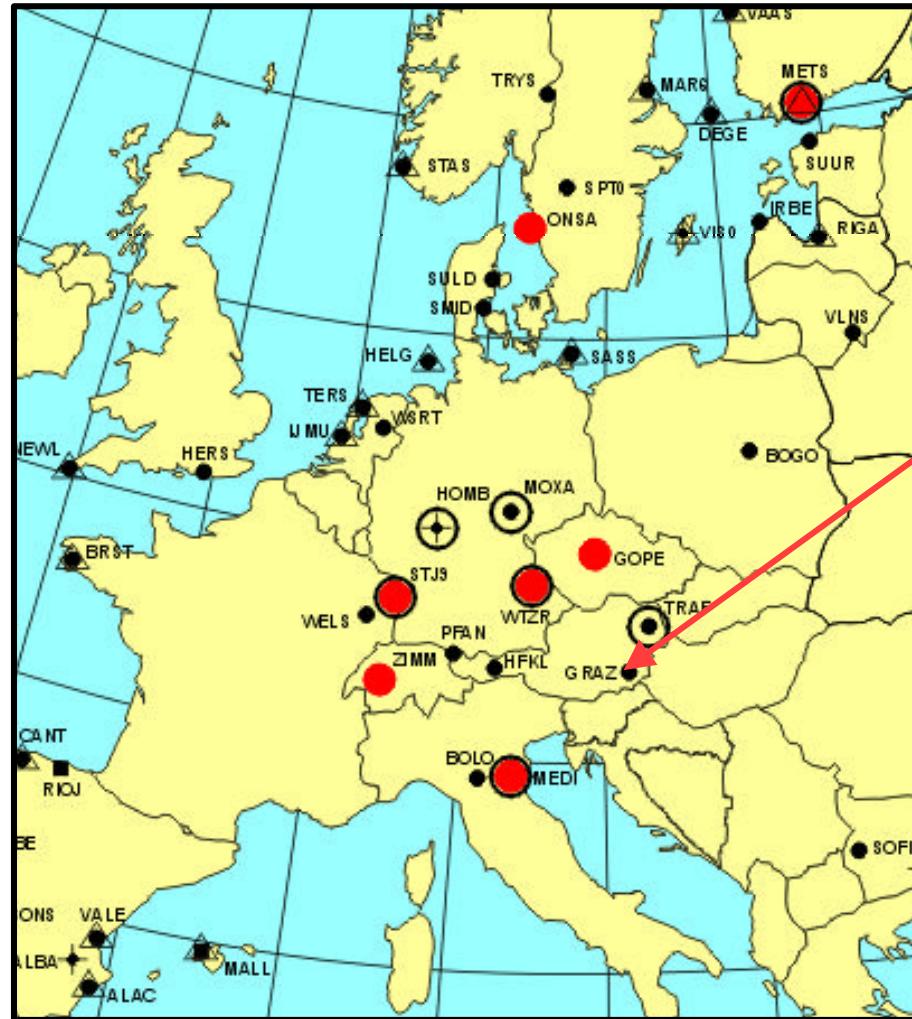

ECGN Stations in Austria: Pfänder

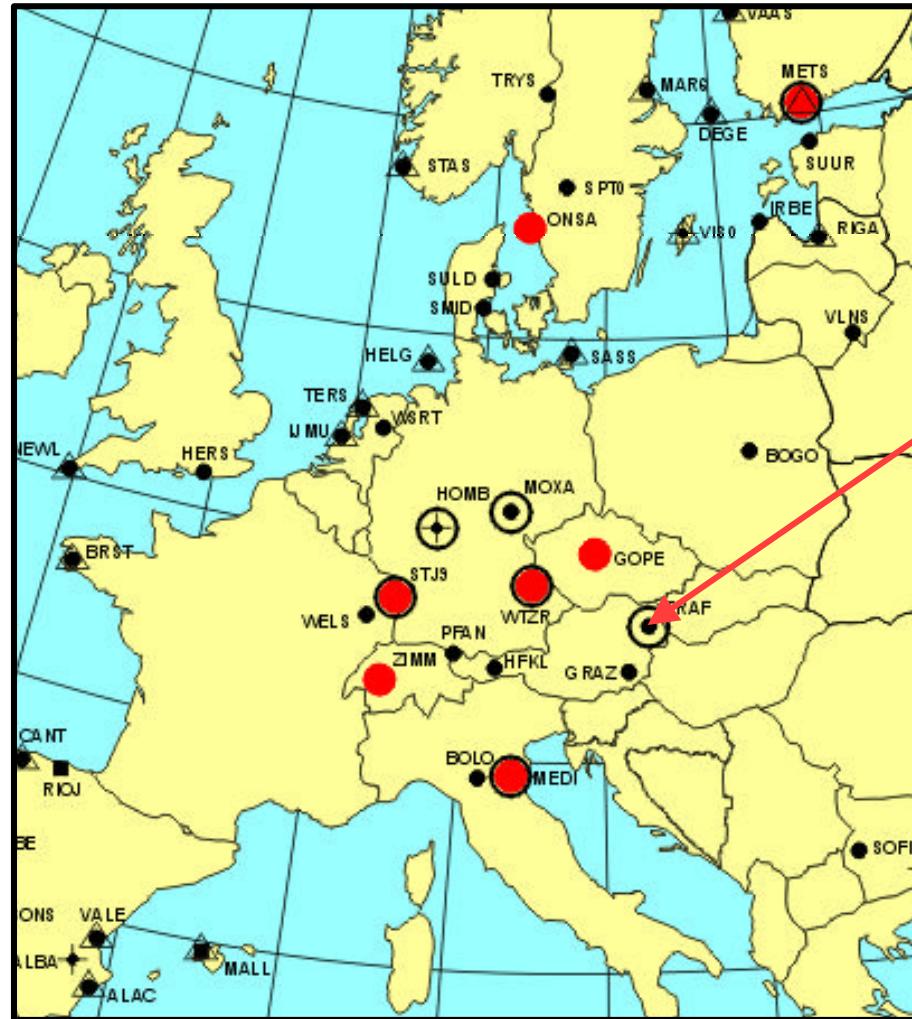

EPN
GPS since 1997:
Levelling/C-values: 1996
local ties 1996-2000
Absolut gravity: 2004

ECGN Stations in Austria: Graz

IGS:
Laser since 1982
GPS since 1992
Levelling/C-values: 1987
Absolut gravity: 2000/04
local ties 1996-2000

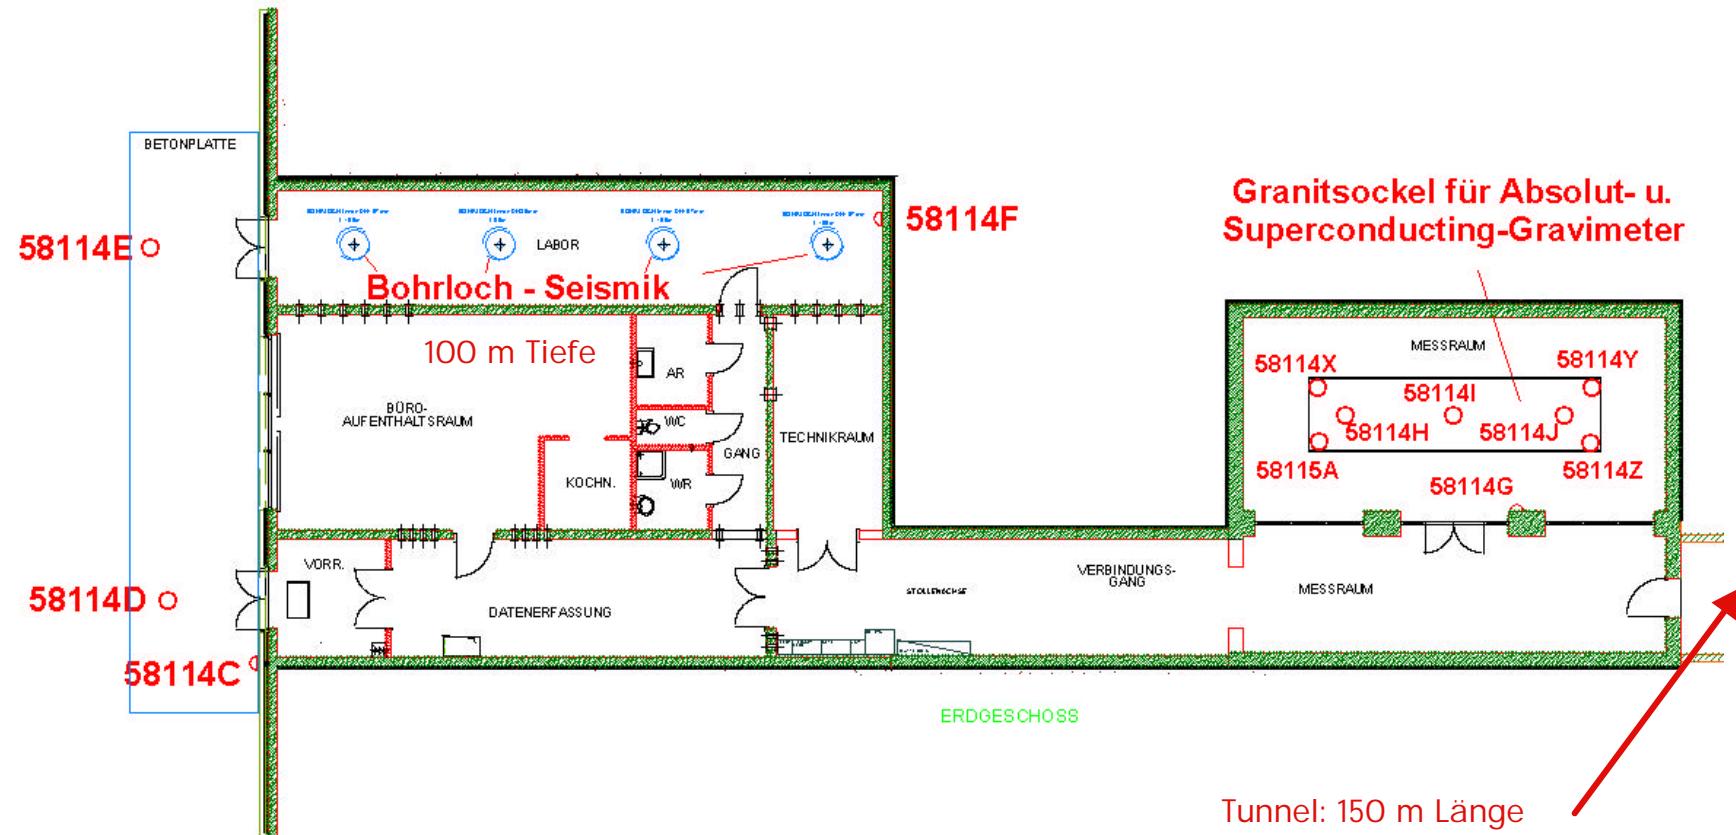

ECGN Stations in Austria: Trafelberg-Conrad Observatory

**GPS since 2004
Levelling/C-values: 2003
local ties 2003/04
Absolut gravity: 2003/04
SCG: 2004**

seismic devices

Conrad - Observatorium - Austria

EPN-TRAFELBERG

TRAFELBERG - Conrad Observatory
