
National report of Sweden

-geodetic activities at Lantmäteriet, the National Land Survey of Sweden

Dan Norin
Lantmäteriet, Geodetic Research Department

EUREF 2004 Symposium
Bratislava, June 2nd-5th, 2004

Contents

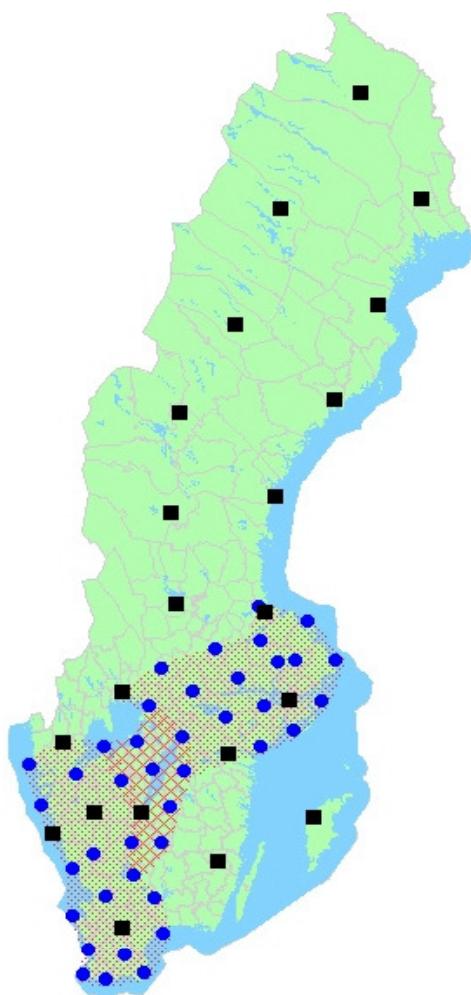

- Network contributions
- SWEPOS™
- RIX 95
- Introduction of new reference systems
 - SWEREF 99
 - ETRS 89 realisation
 - RH 2000
 - New national height system
- Gravity activities

Network contribu- tions

- Seven EPN stations
 - Five in IGS network
 - Six in ECGN
- Operation of NKG
EPN Analysis
Centre
 - NKG=Nordic Geo-
detic Commission

SWEPOS™

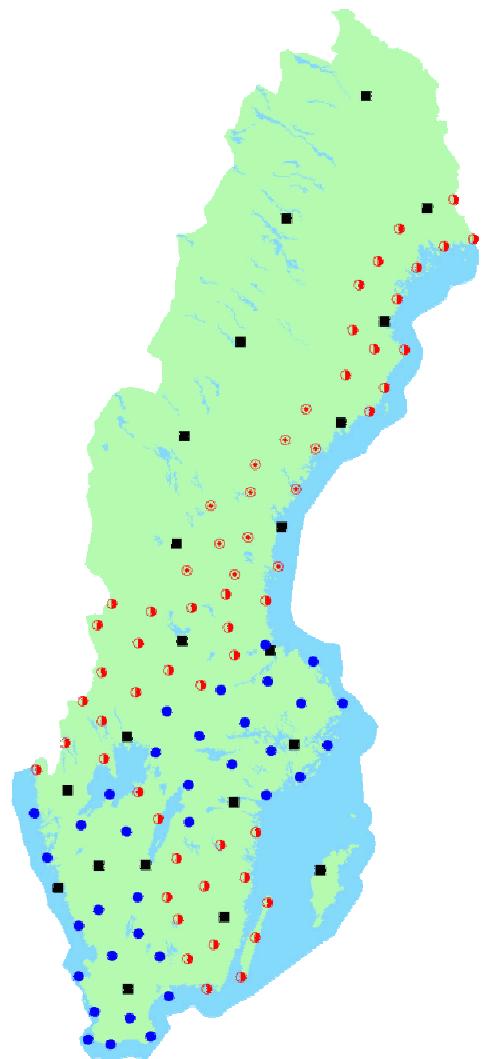

- Today 61 permanent stations
 - 21 complete
 - 40 simplified
- SWEPOS™ Network RTK Service
 - Launched on January 1st 2004
 - Approximately 220 subscriptions

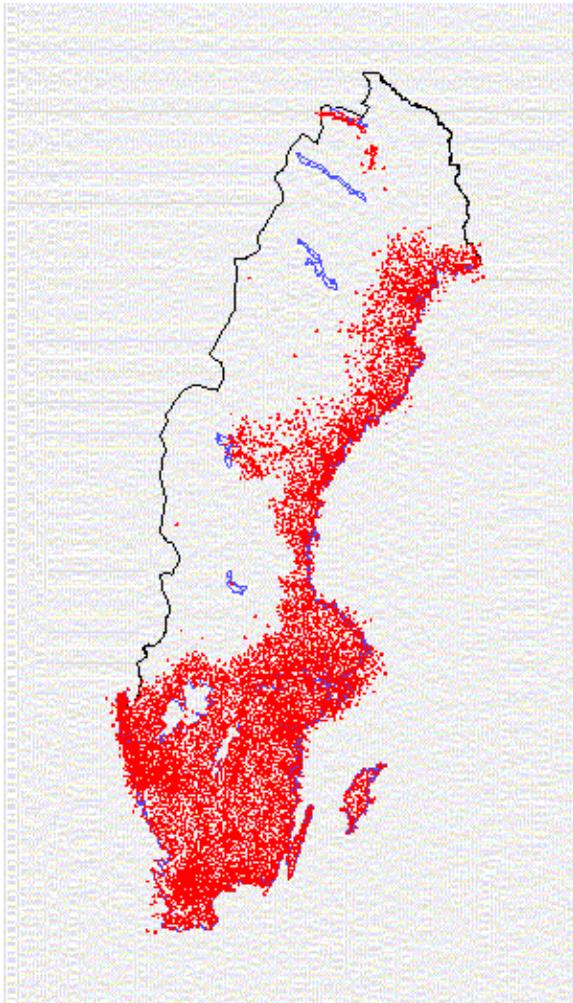

SWEPOS™

- Expansion with regional establishment projects
 - Plan for 56 new stations

RIX 95

- GPS measurements
- Connection of local coordinate systems to national reference frames
 - SWEREF 99
 - RT 90

Introduction of SWEREF 99

- Will replace RT 90
- Can replace coordinate systems used locally
 - 30 (of 290) municipalities
- Decision regarding map projections taken 2003

Introduction of RH 2000

- Third national precise levelling
- Final computation during 2004
 - EVRS 2000
 - Zero-point(-s)
- Can replace height systems used locally
 - 10 (of 290) municipalities

Gravity activities

- Absolute gravity measurements according to NKG gravity plan in 2004
 - Seven existing points
 - Two new points
